

Instance 01 · Planar (Delaunay)

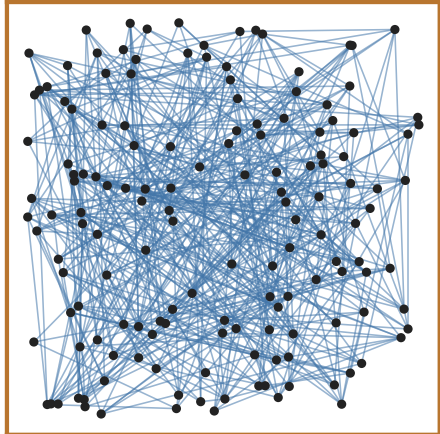

Top: ground truth (left) vs winning submission (right) · LB = 0
Ground truth · n=150, m=431, k=0

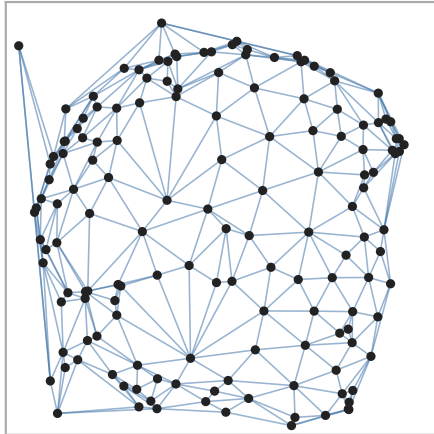

Daniel Kohrt (winner) · n=150, m=431, k=0

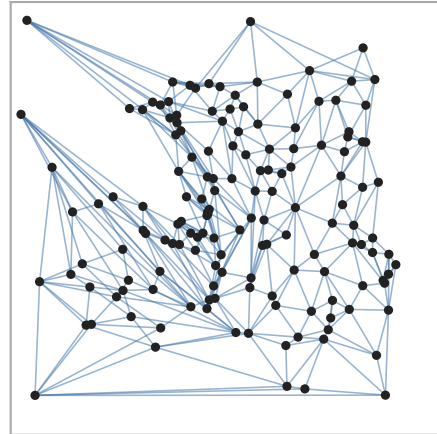

Input (shuffled) · k=222

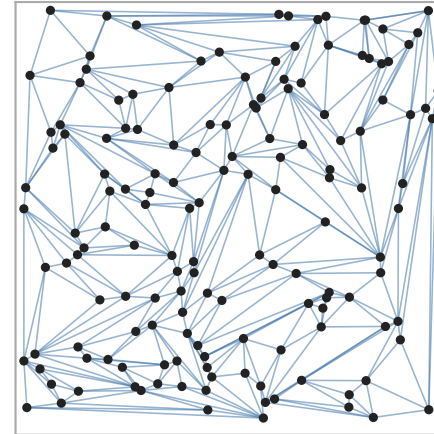

Huixue Chen · k=0

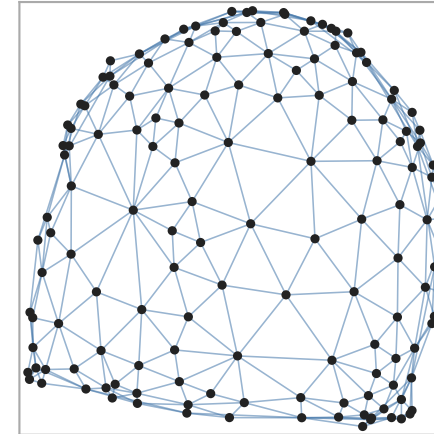

Miguel Ángel Caballero García · k=4

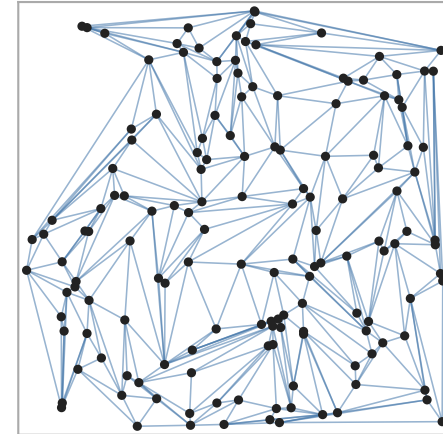

Mihail Atanasov · k=0

Ming Han Tsai · k=8

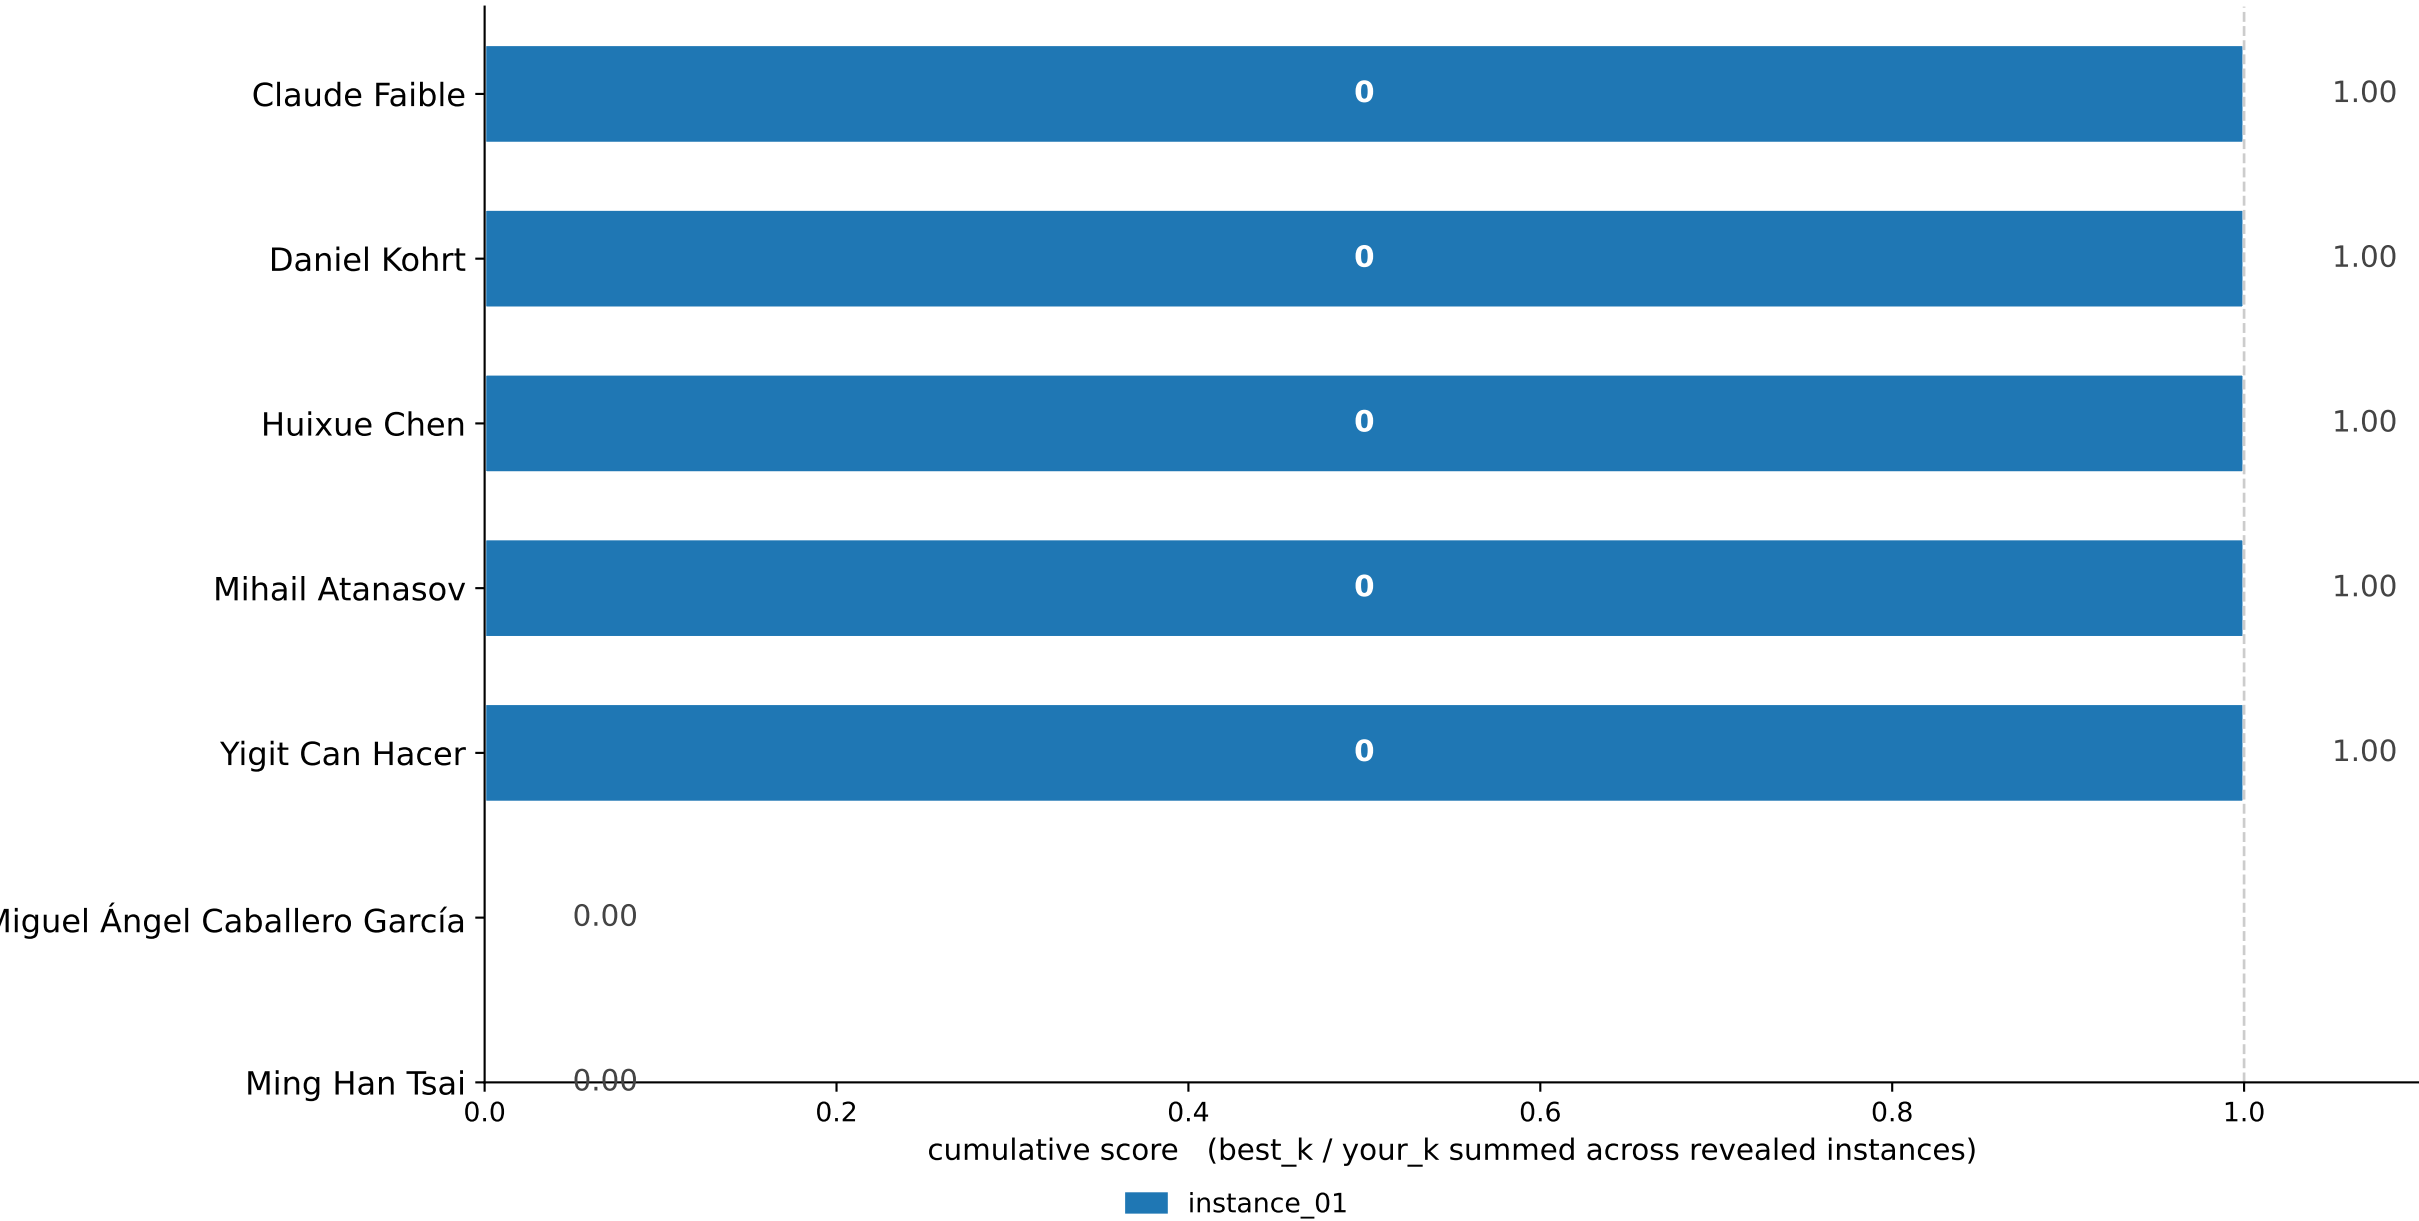

Yigit Can Hacer · k=0

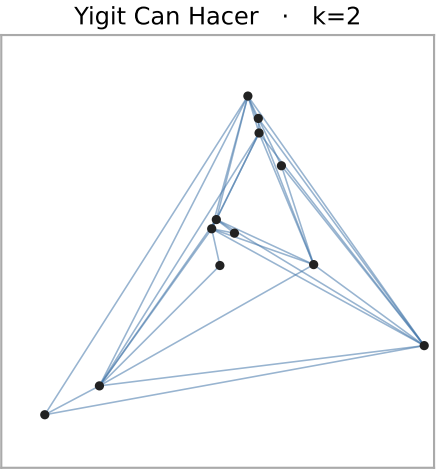

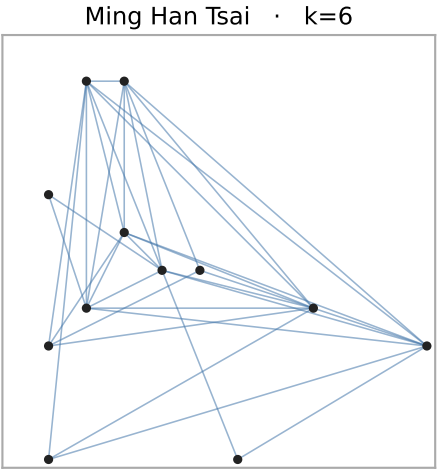

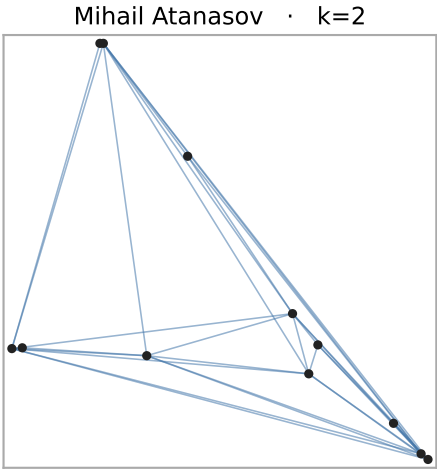

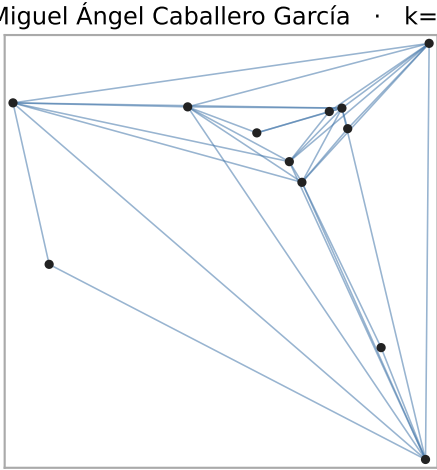

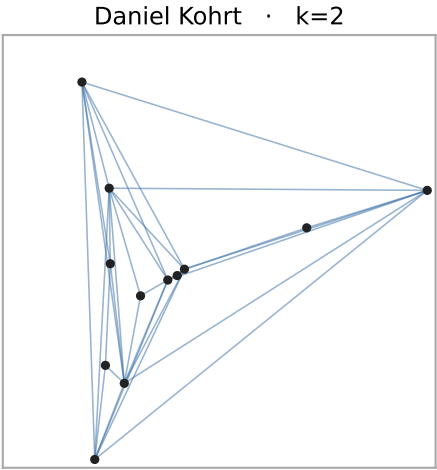

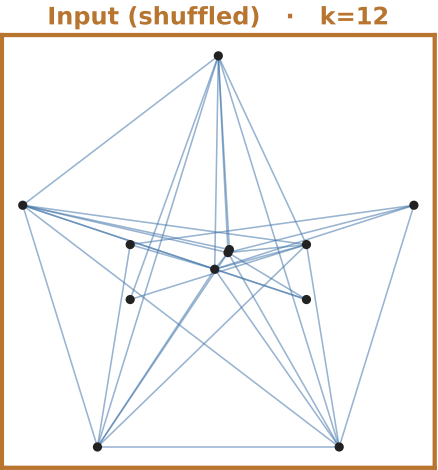

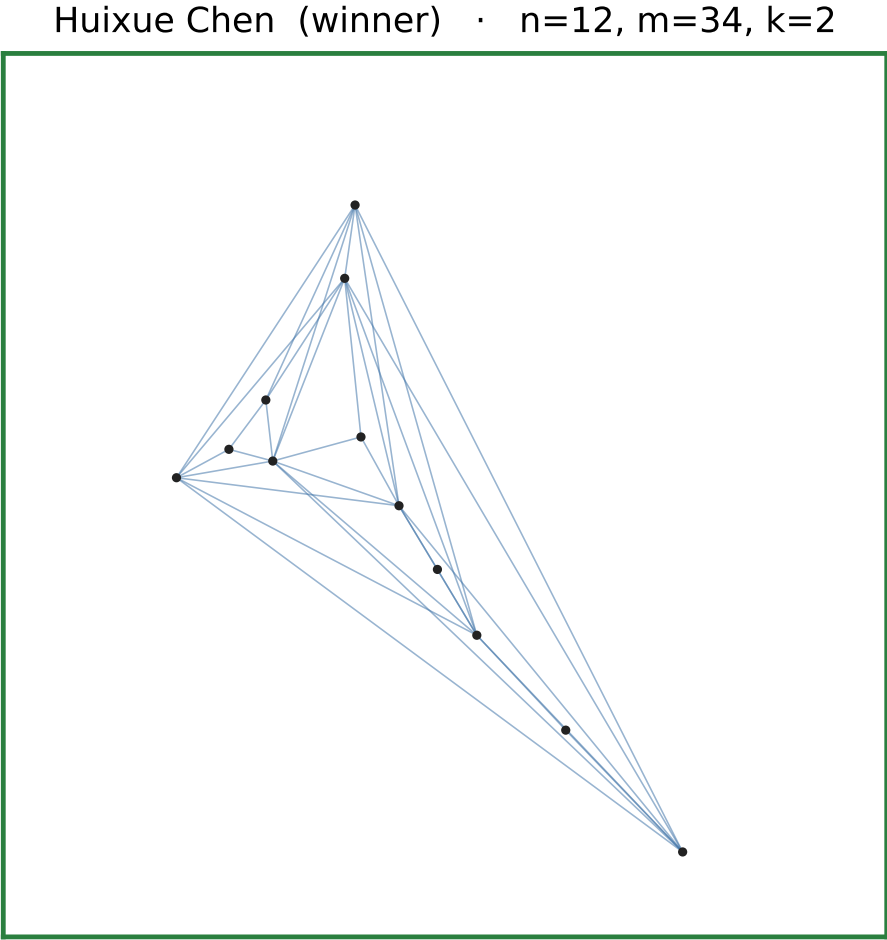

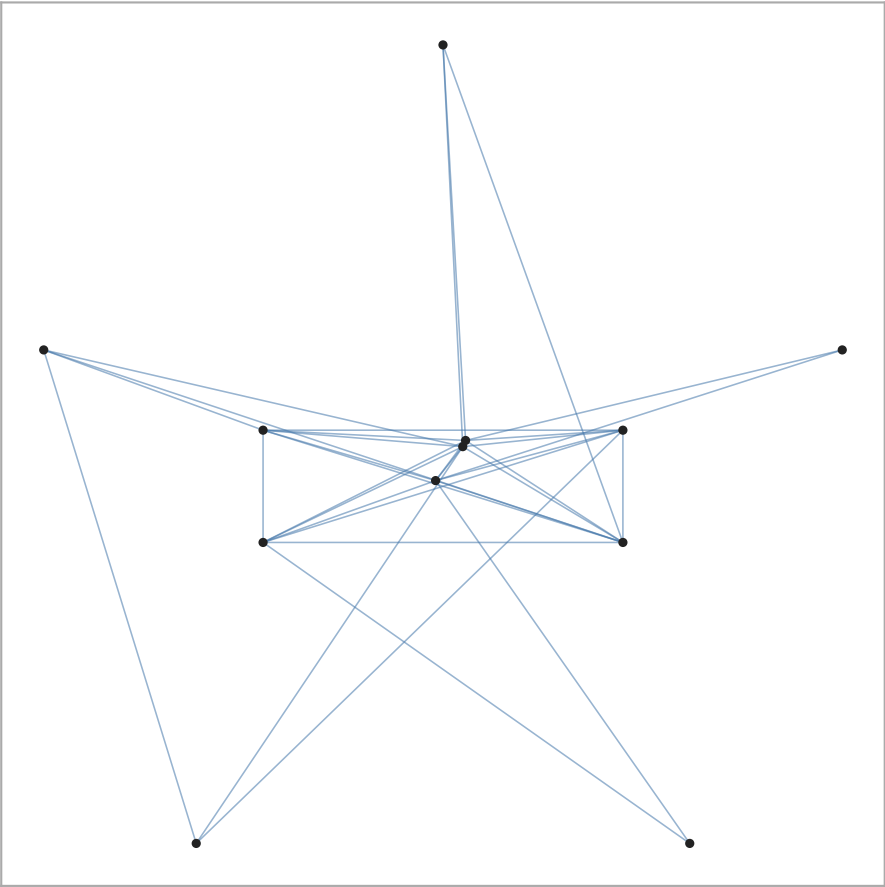

After Instance 1: instance_01

Cumulative score across instance_01 ... instance_01 · bar width = best_k / your_k · number inside = your k

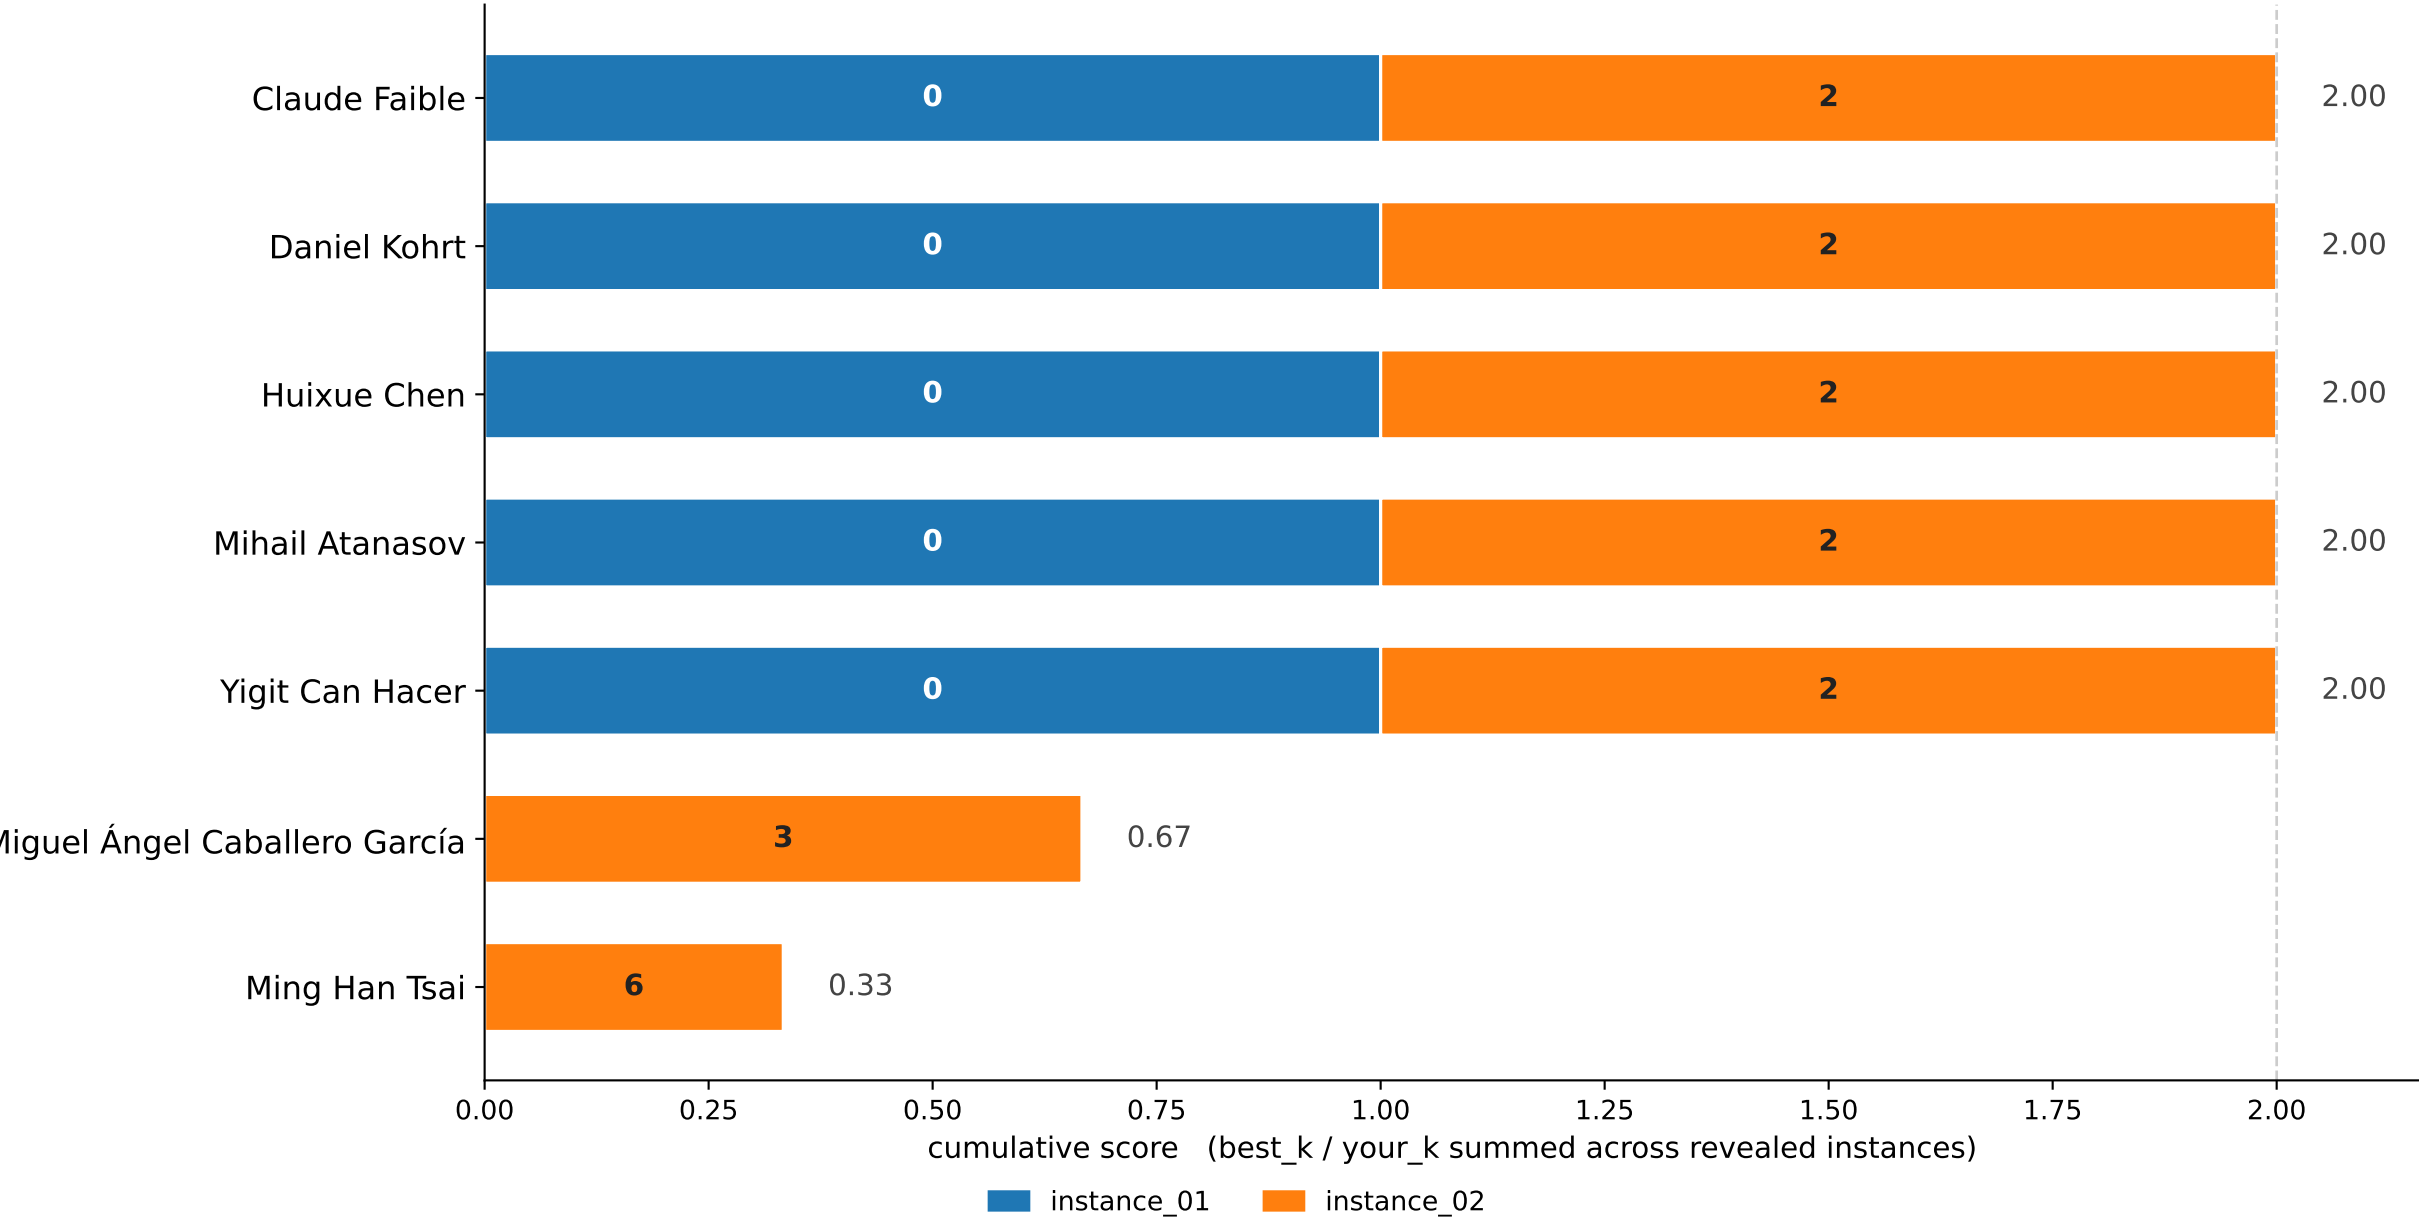

Instance 02 · Small dense (K_7 + 5 tail)

Top: ground truth (left) vs winning submission (right) · LB = 2
Ground truth · n=12, m=34, k=12

After Instance 2: instance_02

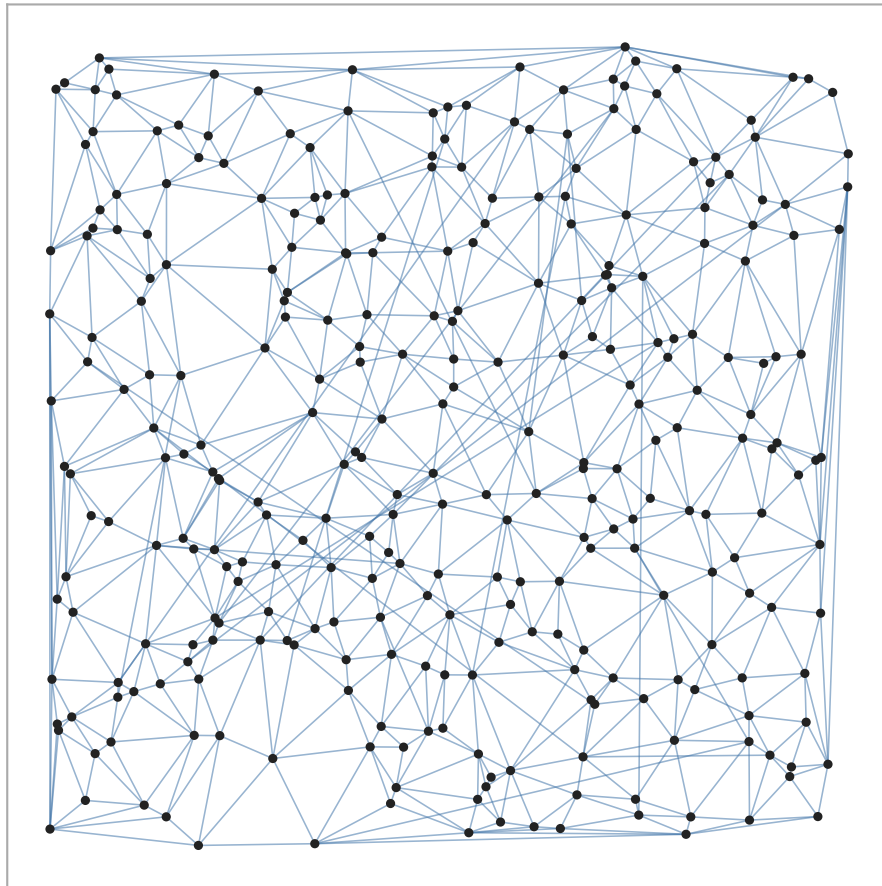

Cumulative score across instance_01 ... instance_02 · bar width = best_k / your_k · number inside = your k

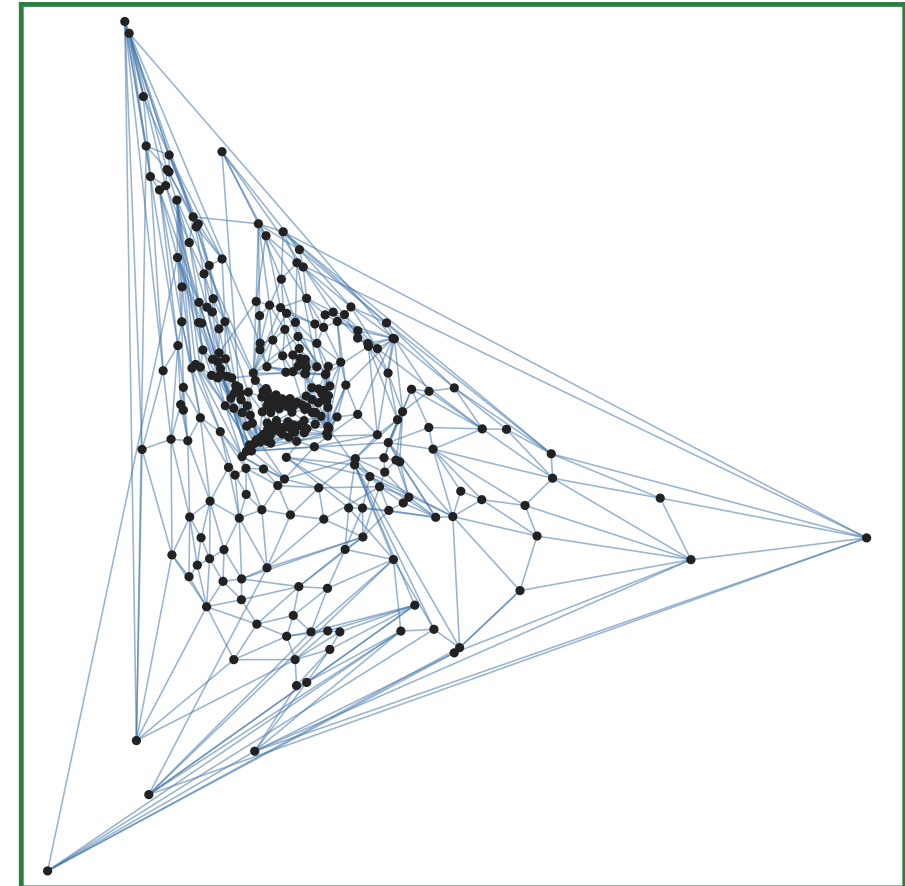

Instance 03 · Near-planar + 20 chords

Top: ground truth (left) vs winning submission (right) · LB = unknown

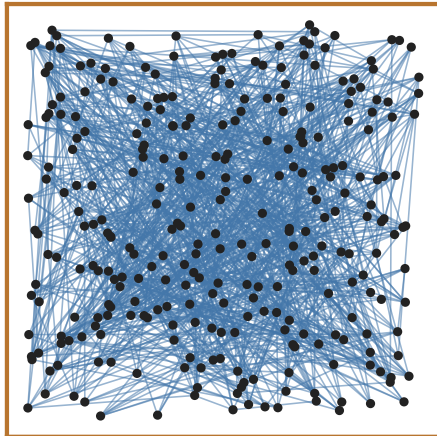

Ground truth · $n=300$, $m=901$, $k=46$

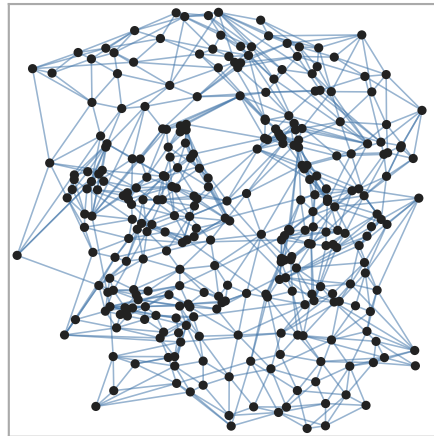

Daniel Kohrt (winner) · $n=300$, $m=901$, $k=9$

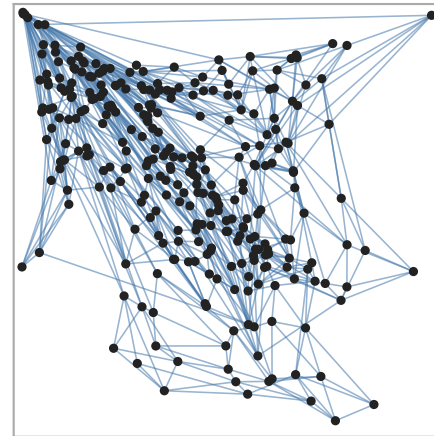

Input (shuffled) · $k=455$

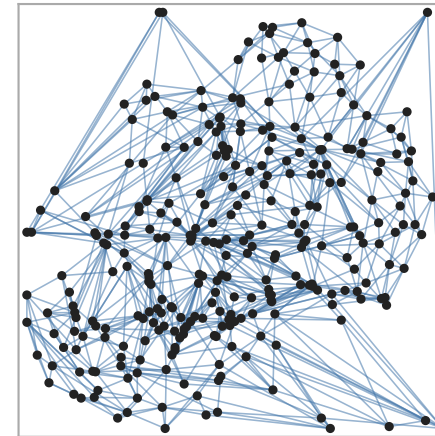

Huixue Chen · $k=13$

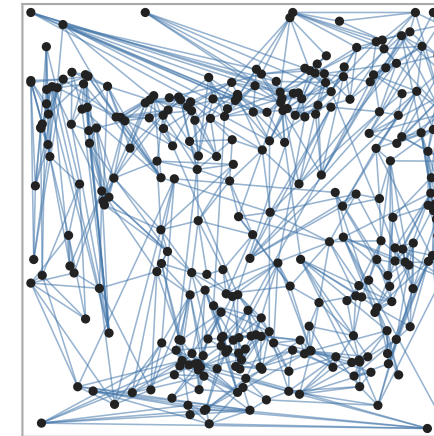

Miguel Ángel Caballero García · $k=12$

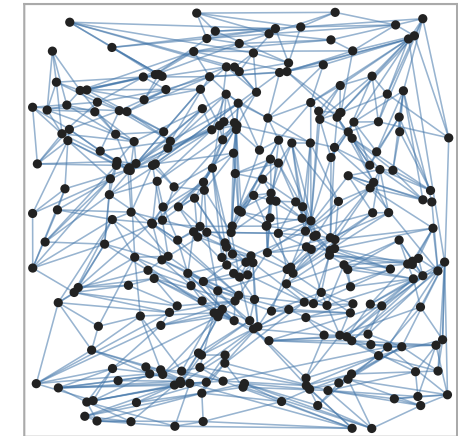

Mihail Atanasov · $k=12$

Ming Han Tsai · $k=23$

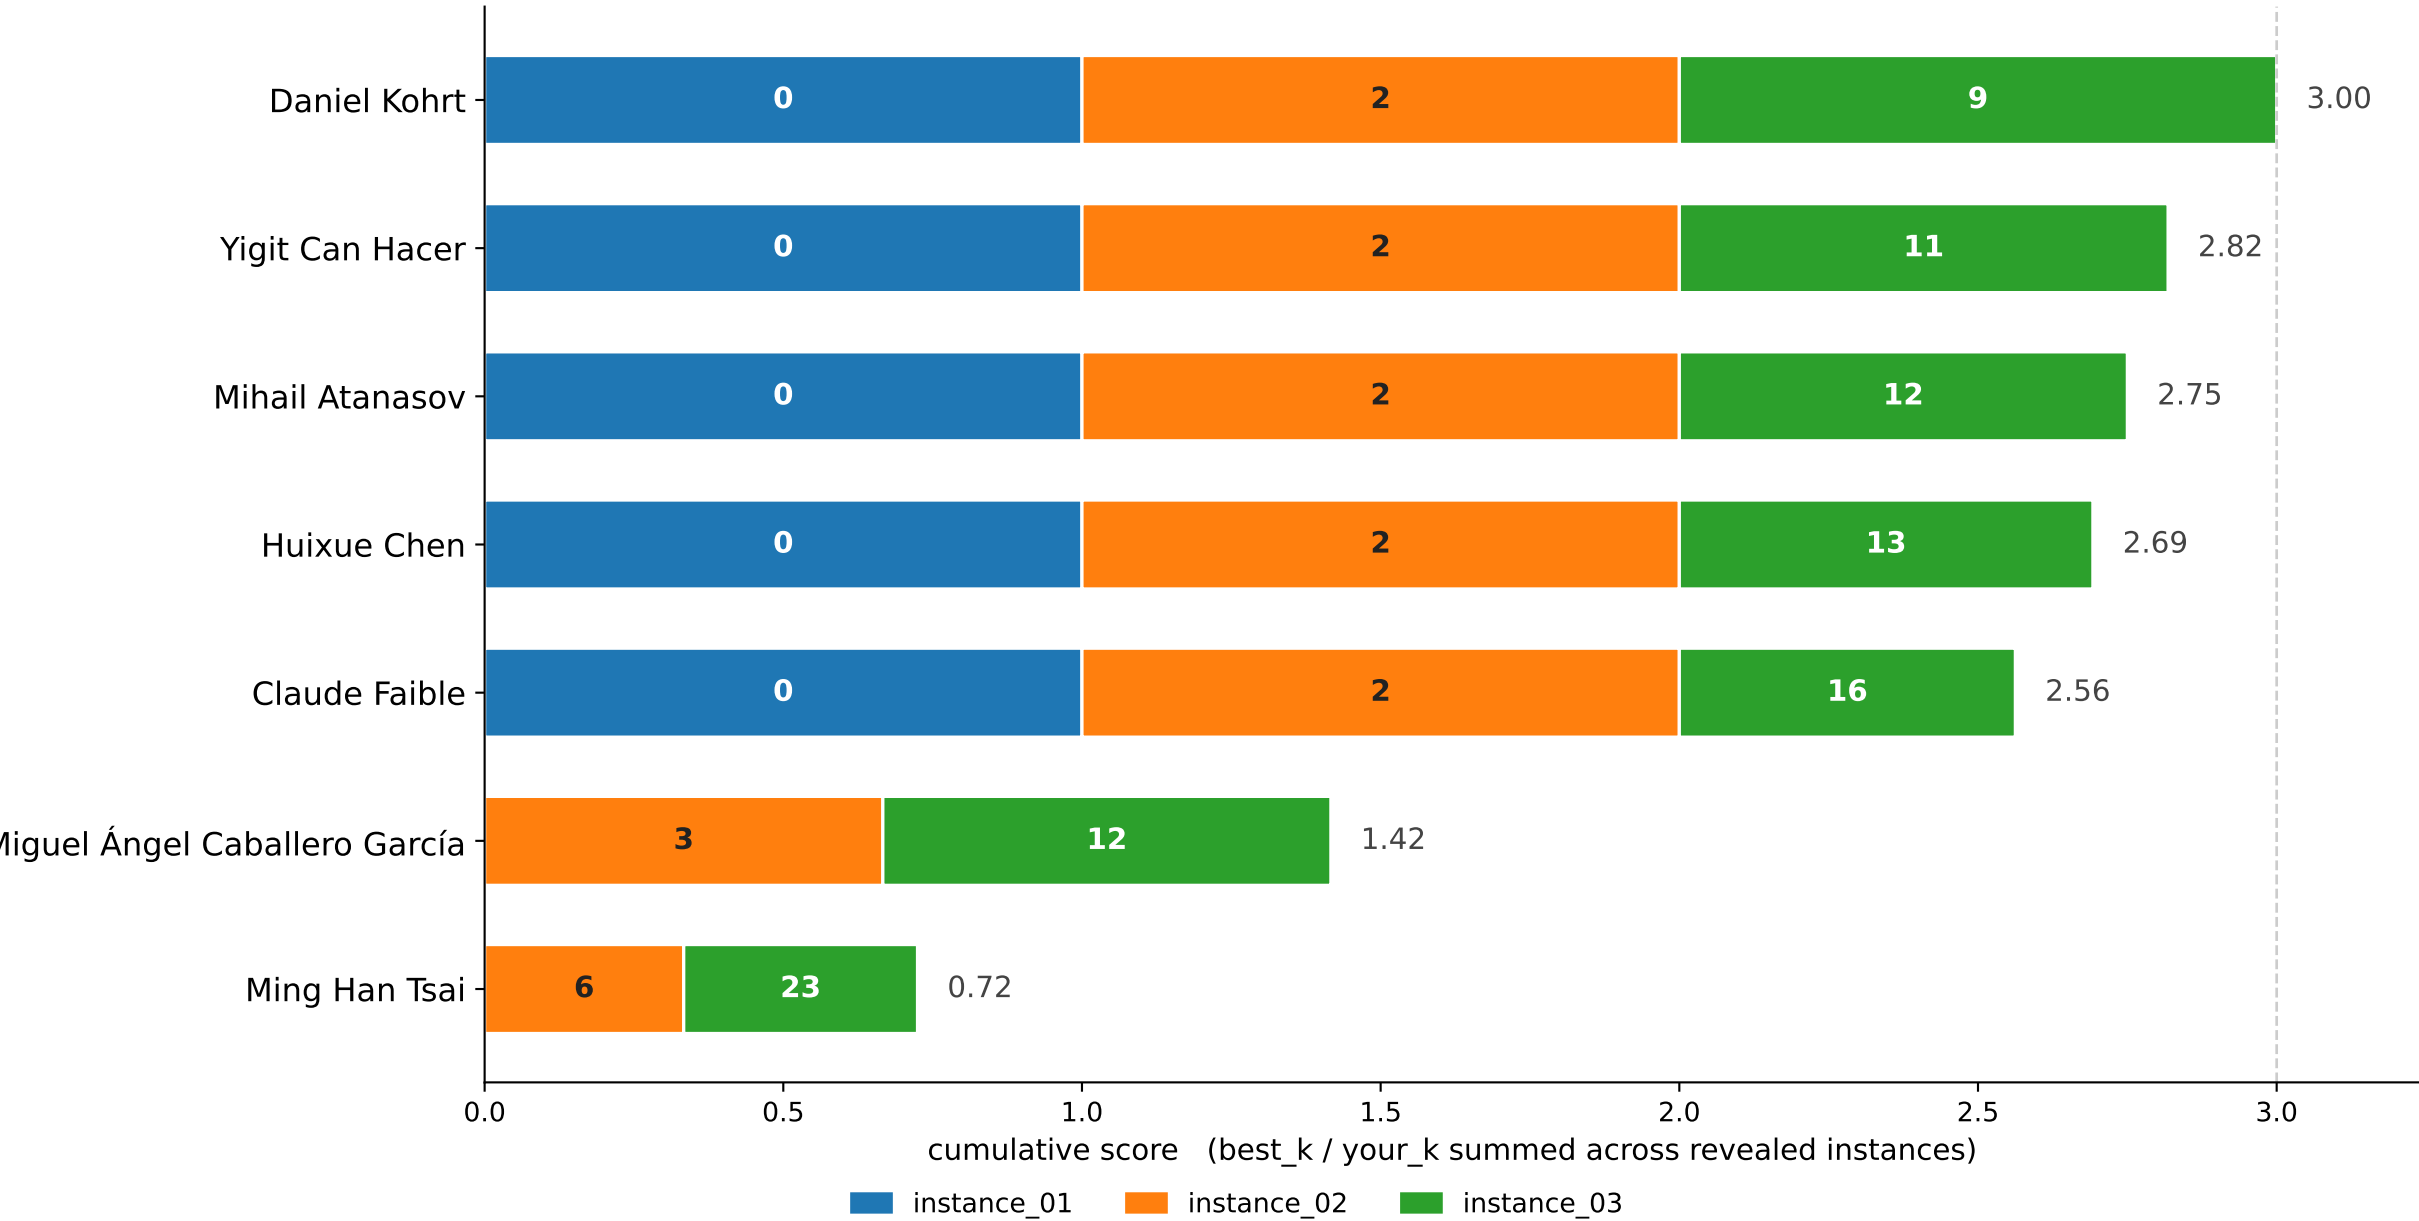

Yigit Can Hacer · $k=11$

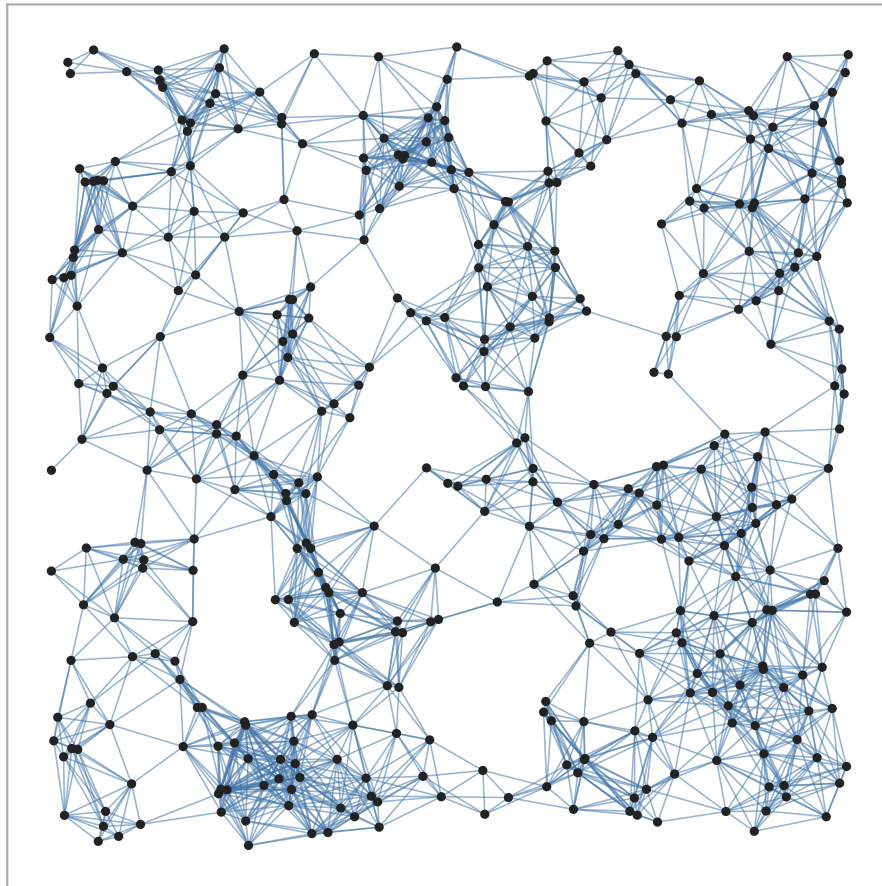

After Instance 3: instance_03

Cumulative score across instance_01 ... instance_03 · bar width = best_k / your_k · number inside = your k

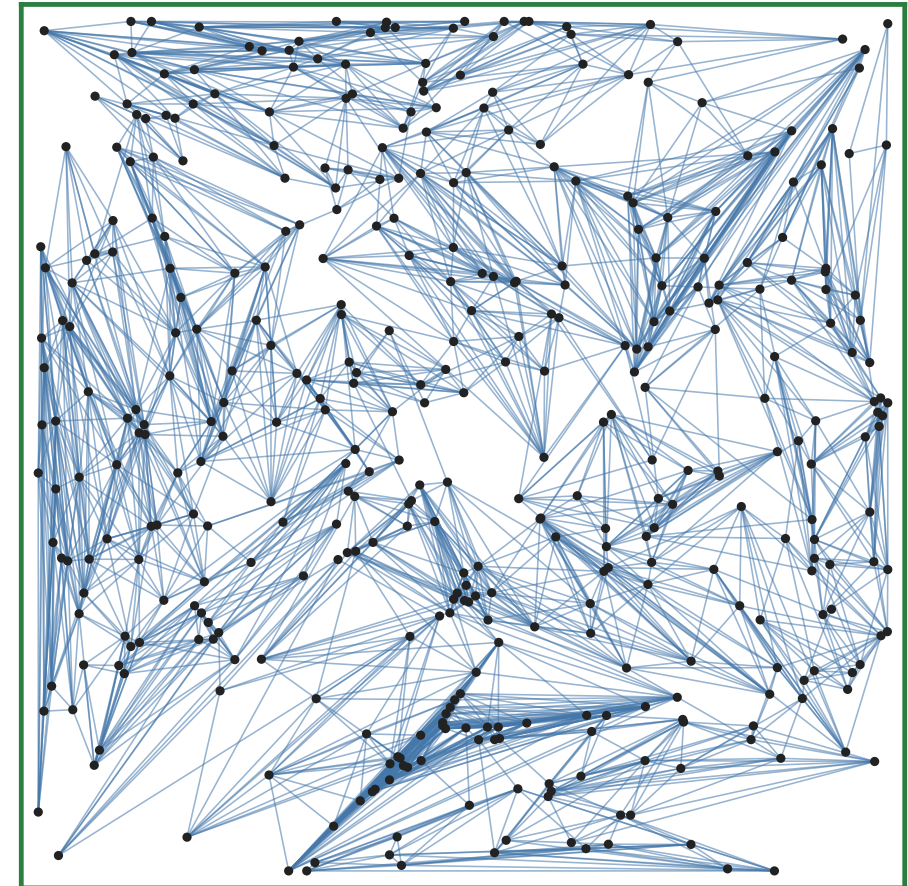

Instance 04 · Random geometric

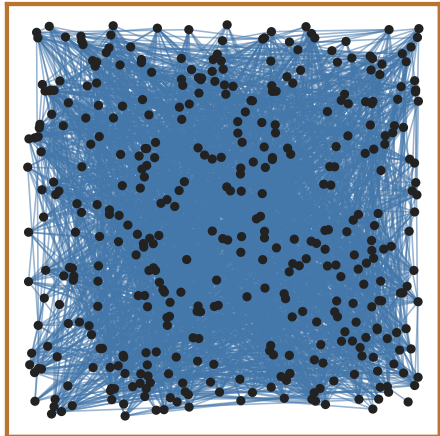

Top: ground truth (left) vs winning submission (right) · LB = unknown
Ground truth · $n=400$, $m=2482$, $k=59$

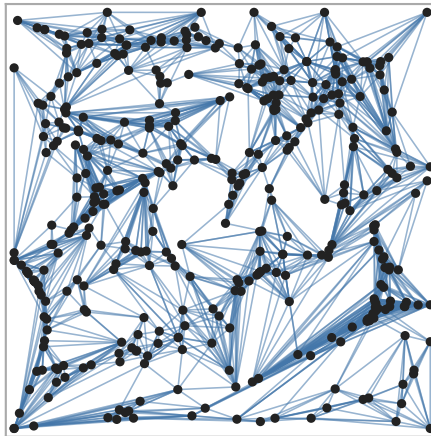

Yigit Can Hacer (winner) · $n=400$, $m=2482$, $k=33$

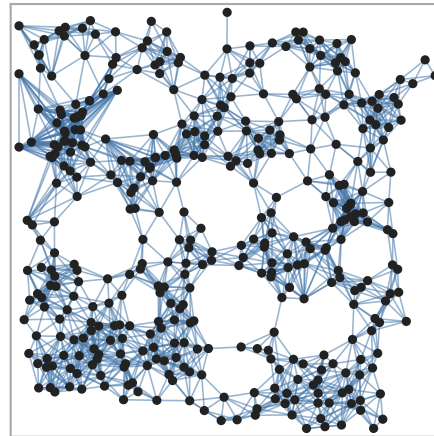

Input (shuffled) · $k=1235$

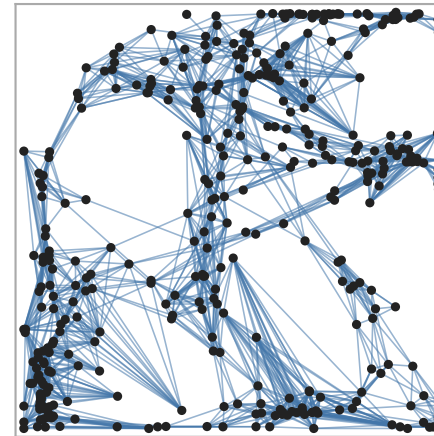

Daniel Kohrt · $k=33$

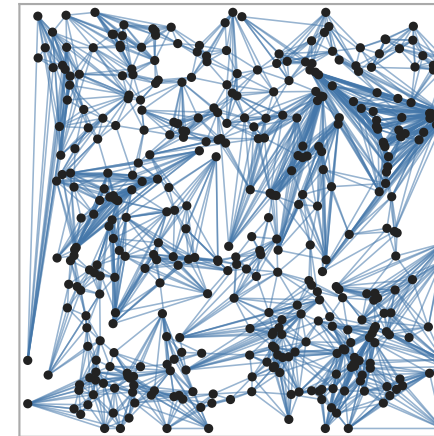

Huixue Chen · $k=46$

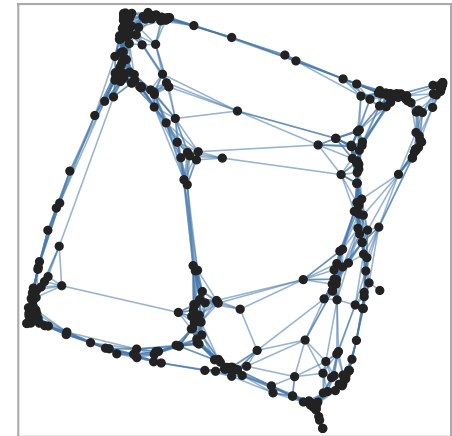

Miguel Ángel Caballero García · $k=49$

Mihail Atanasov · $k=36$

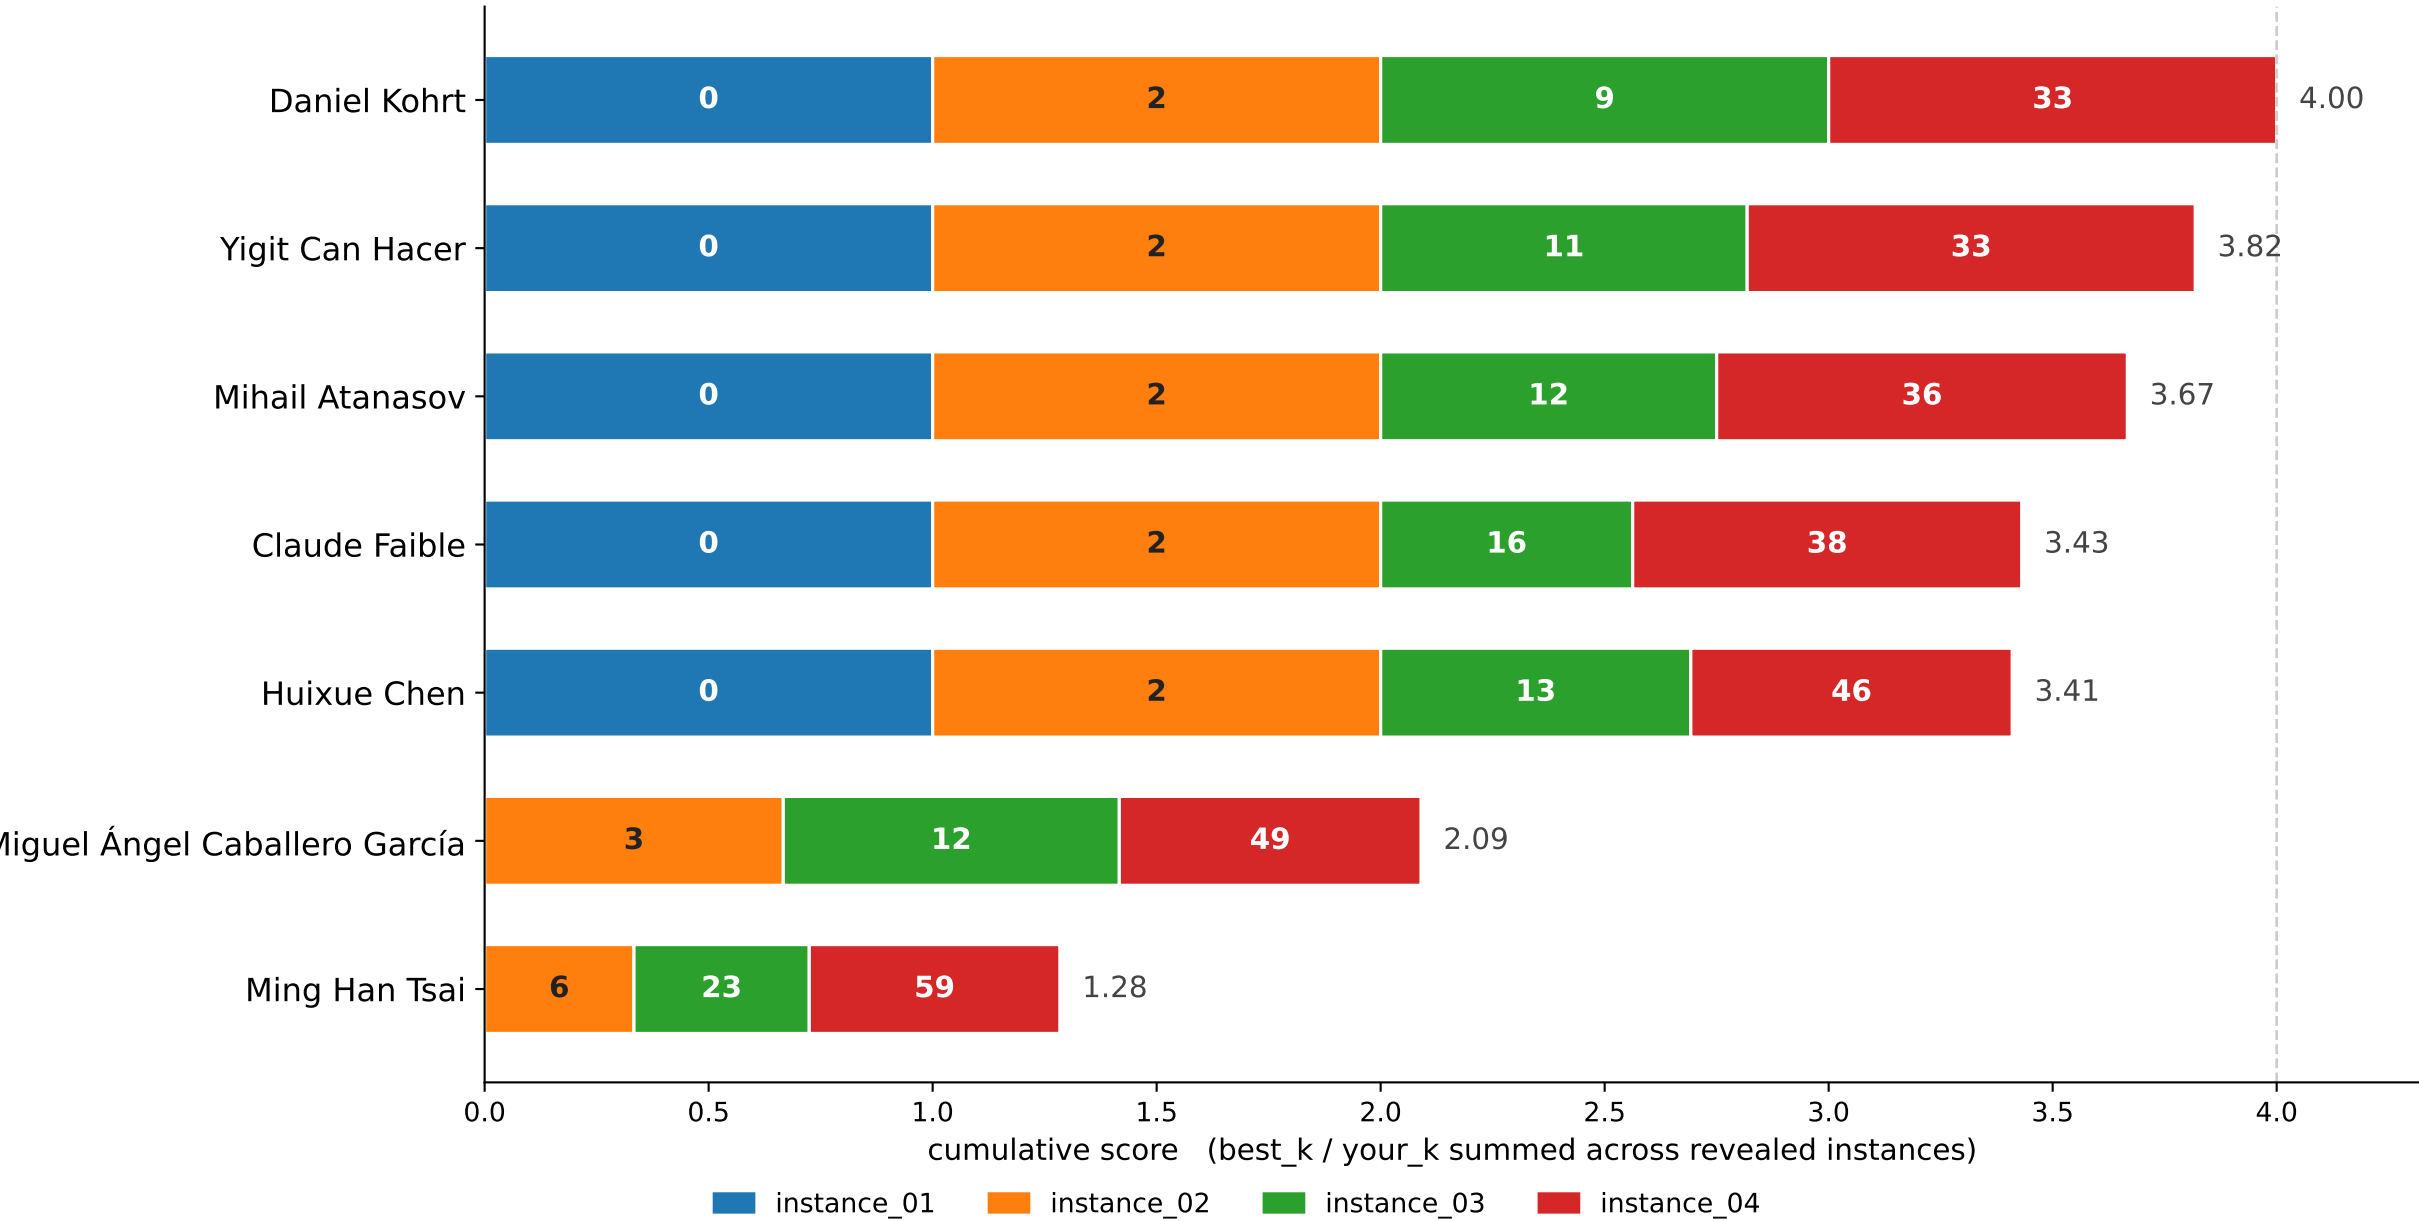

Ming Han Tsai · $k=59$

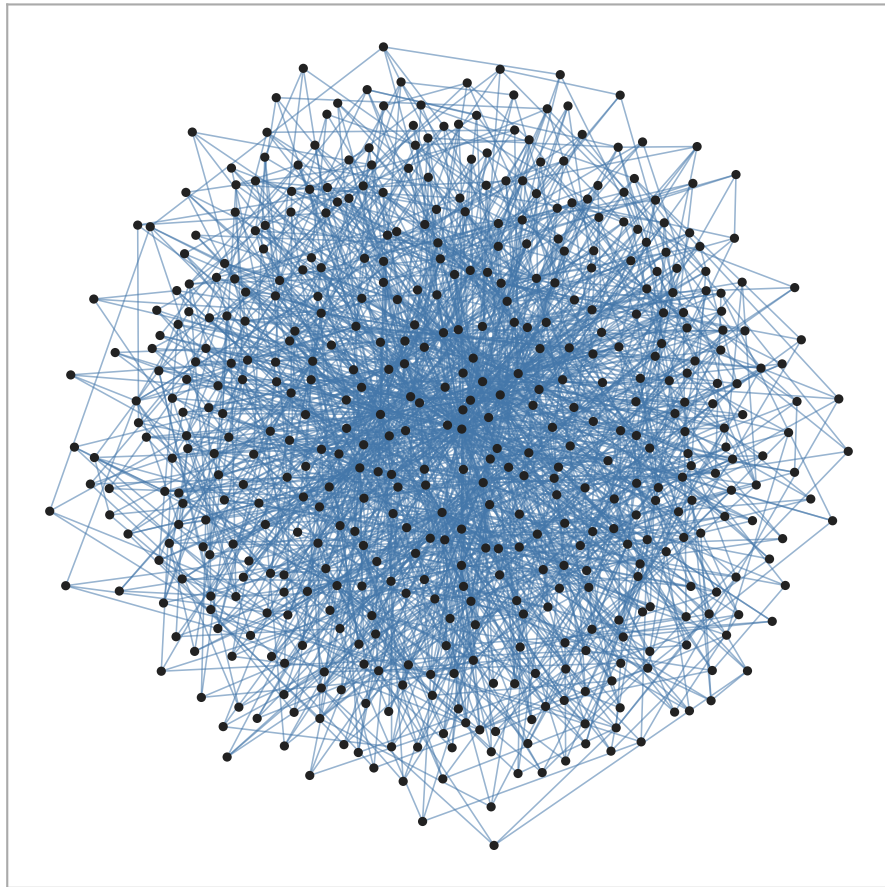

After Instance 4: instance_04

Cumulative score across instance_01 ... instance_04 · bar width = best_k / your_k · number inside = your k

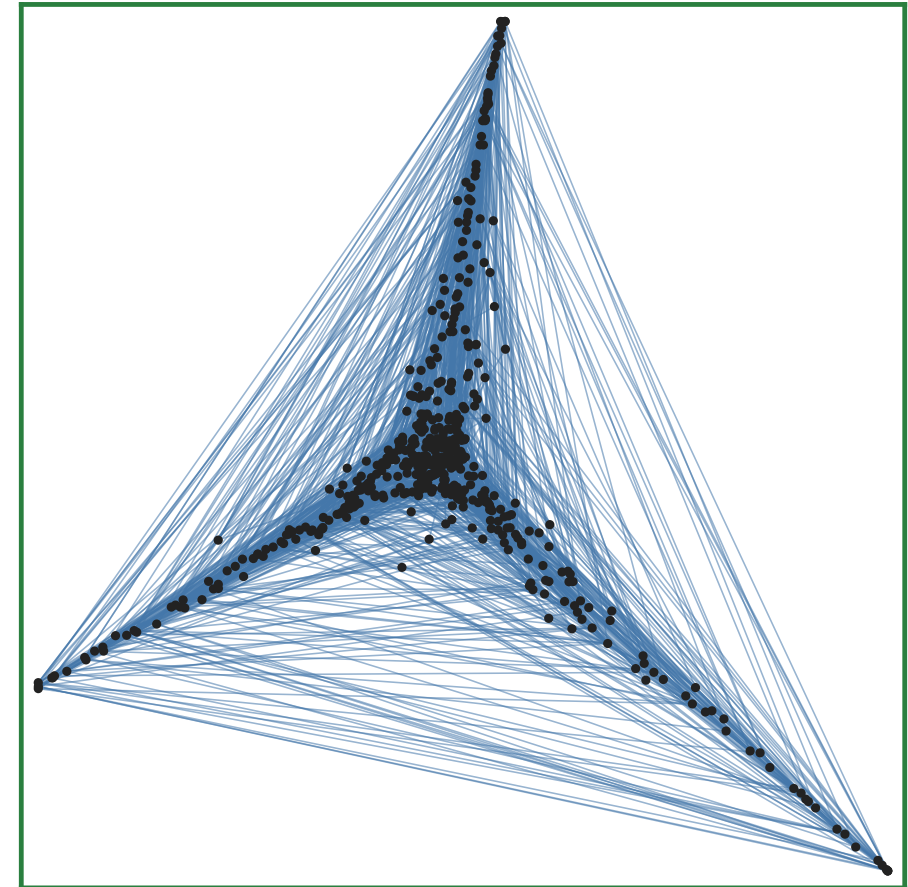

Instance 05 · Scale-free (BA m=4)

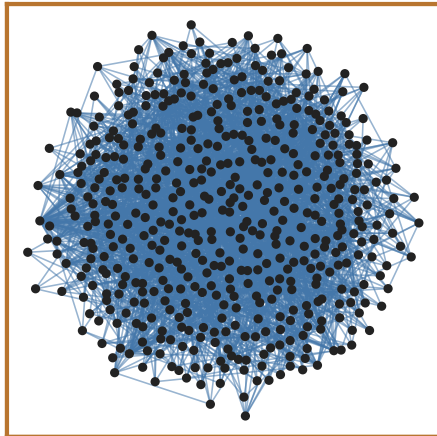

Top: ground truth (left) vs winning submission (right) · LB = unknown
Ground truth · n=500, m=1984, k=593

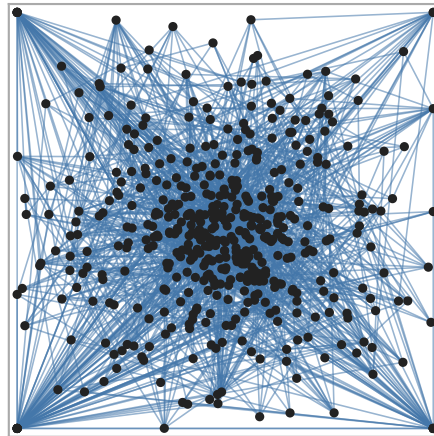

Daniel Kohrt (winner) · n=500, m=1984, k=193

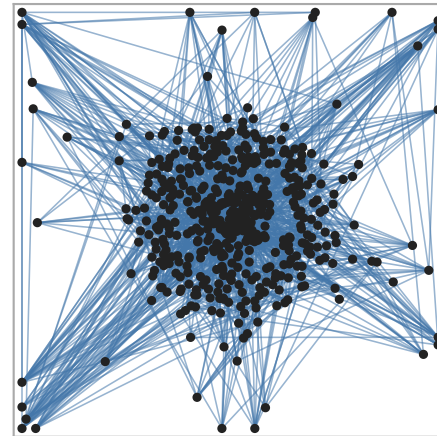

Input (shuffled) · k=992

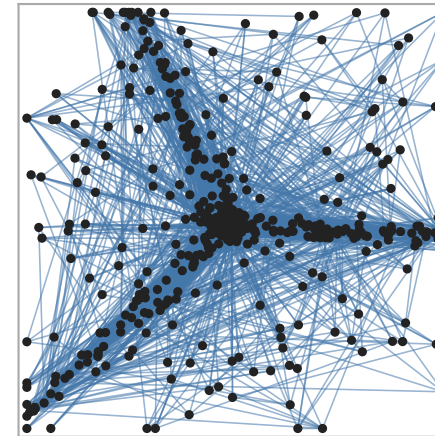

Huixue Chen · k=346

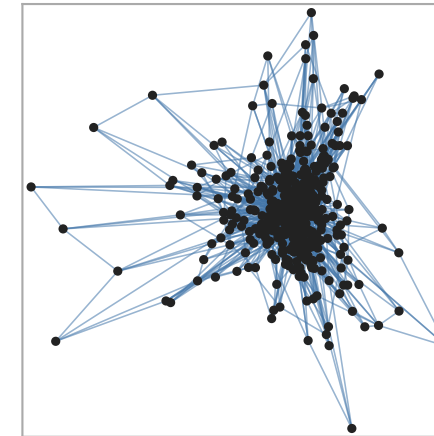

Miguel Ángel Caballero García · k=334

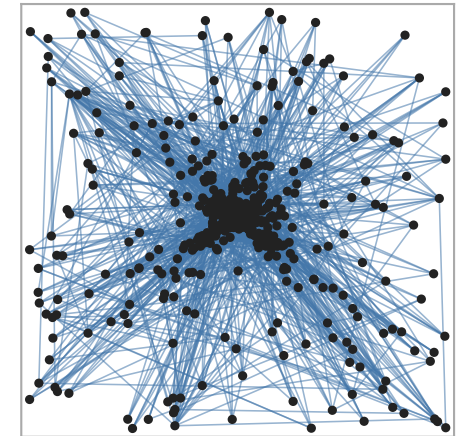

Mihail Atanasov · k=241

Ming Han Tsai · k=544

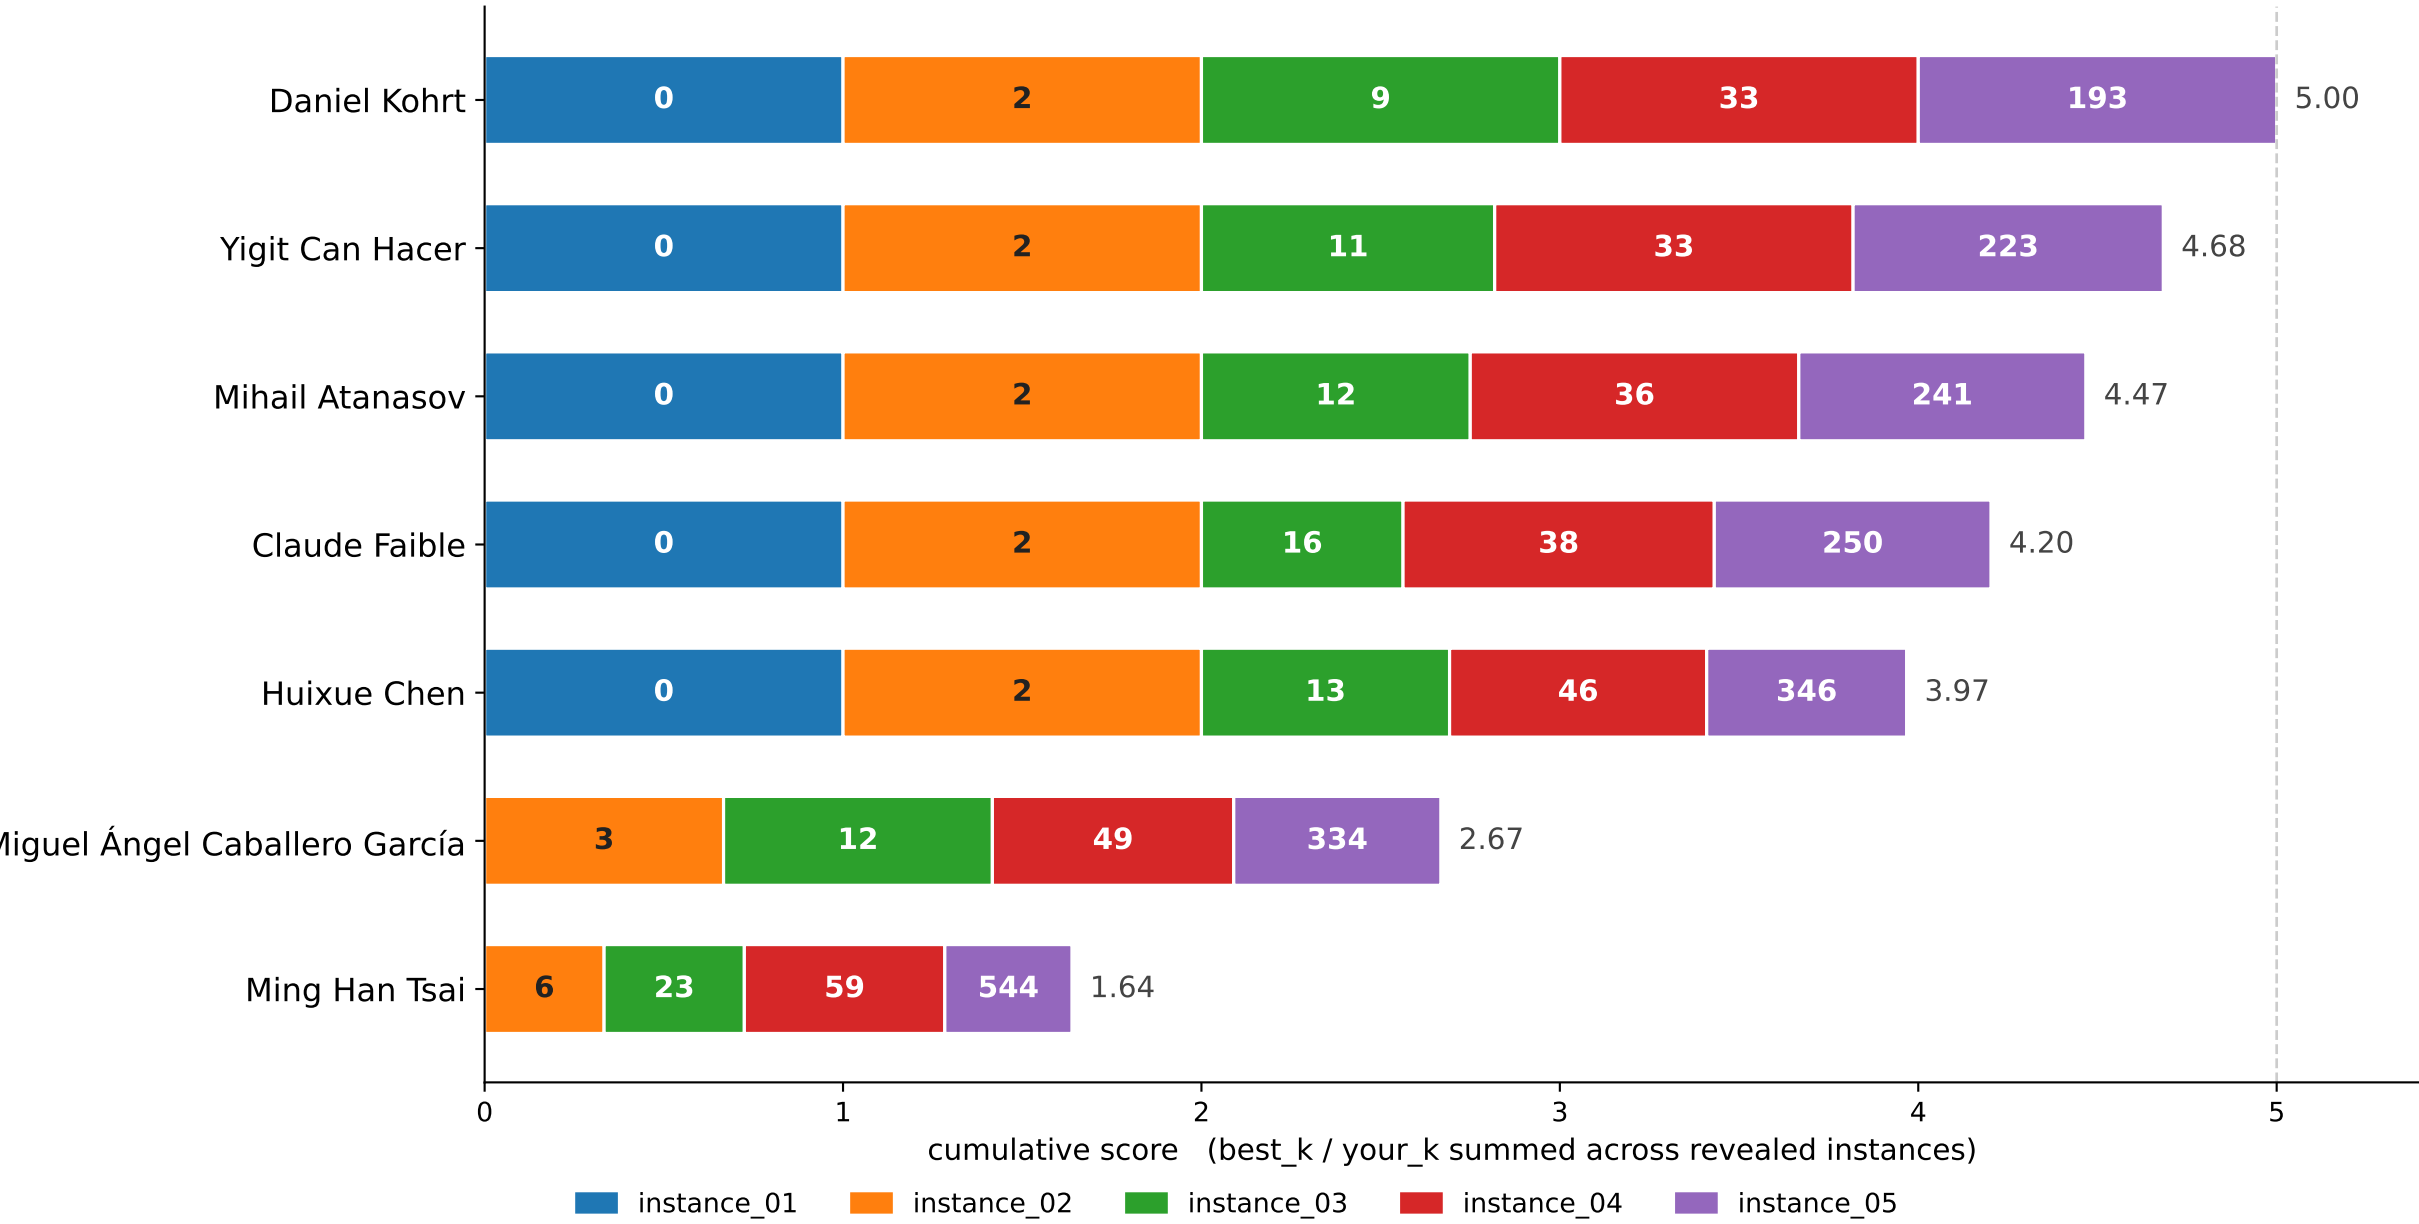

Yigit Can Hacer · k=223

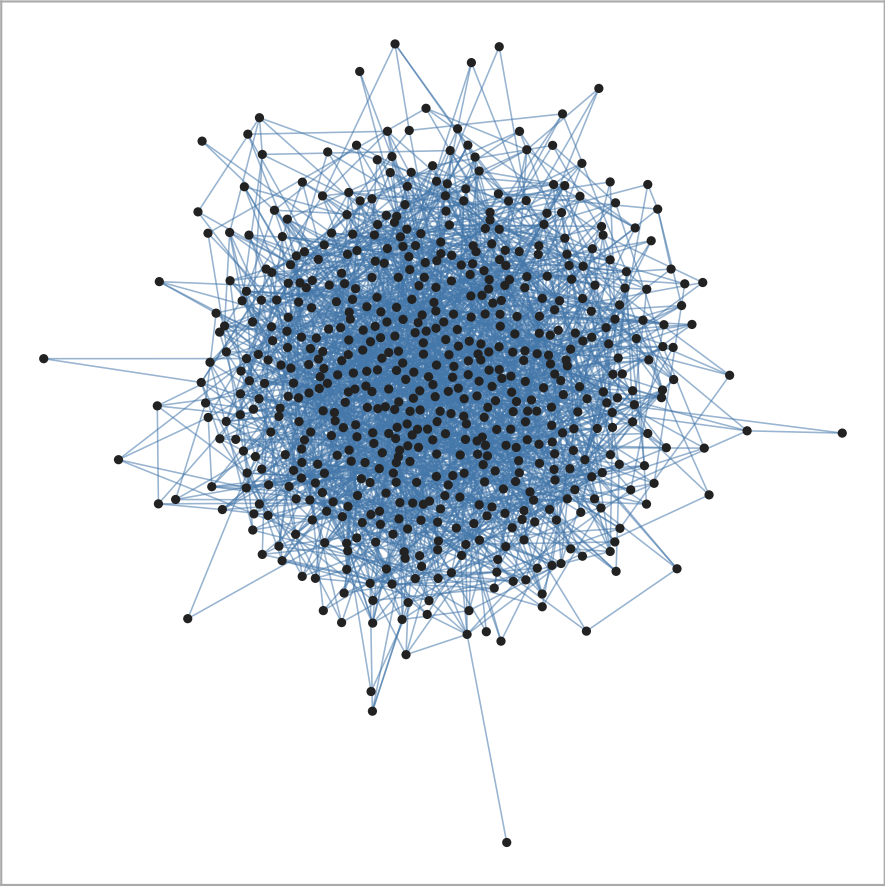

After Instance 5: instance_05

Cumulative score across instance_01 ... instance_05 · bar width = best_k / your_k · number inside = your k

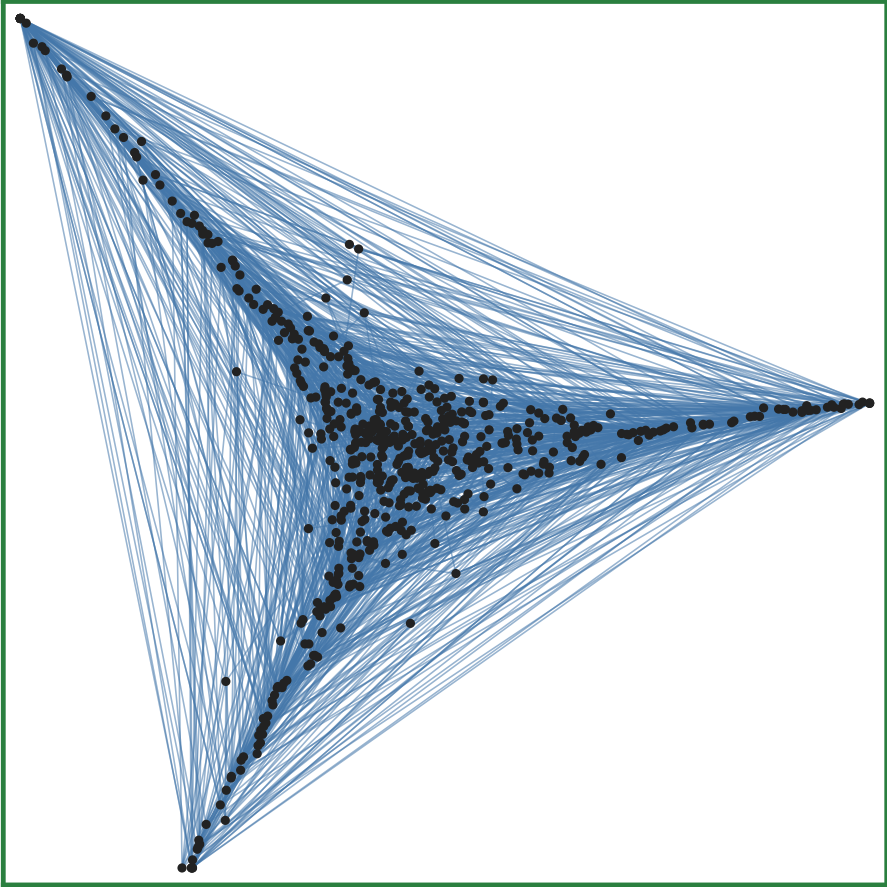

Instance 06 · ER medium (avg deg 8)

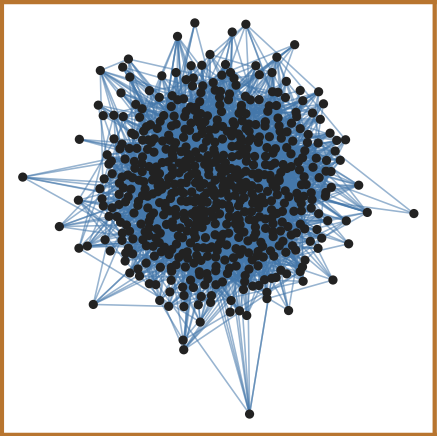

Top: ground truth (left) vs winning submission (right) · LB = unknown
Ground truth · n=600, m=2379, k=492

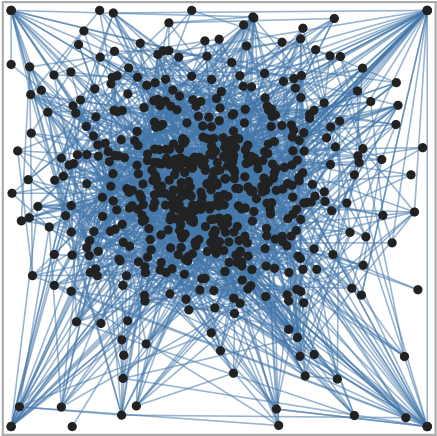

Daniel Kohrt (winner) · n=600, m=2379, k=186

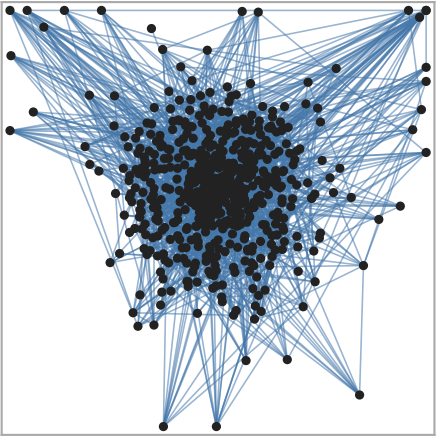

Input (shuffled) · k=1173

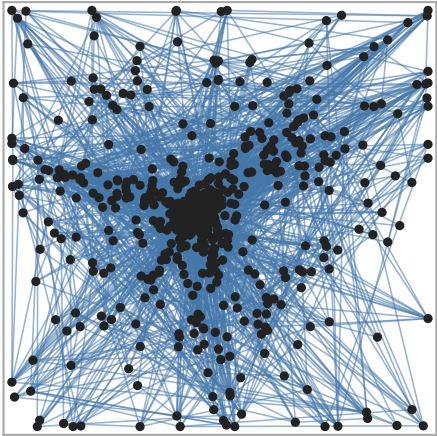

Huixue Chen · k=362

Miguel Ángel Caballero García · k=353

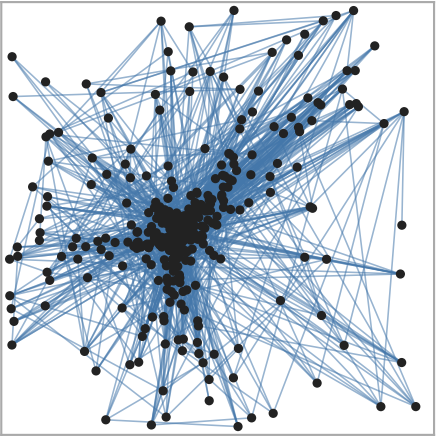

Mihail Atanasov · k=264

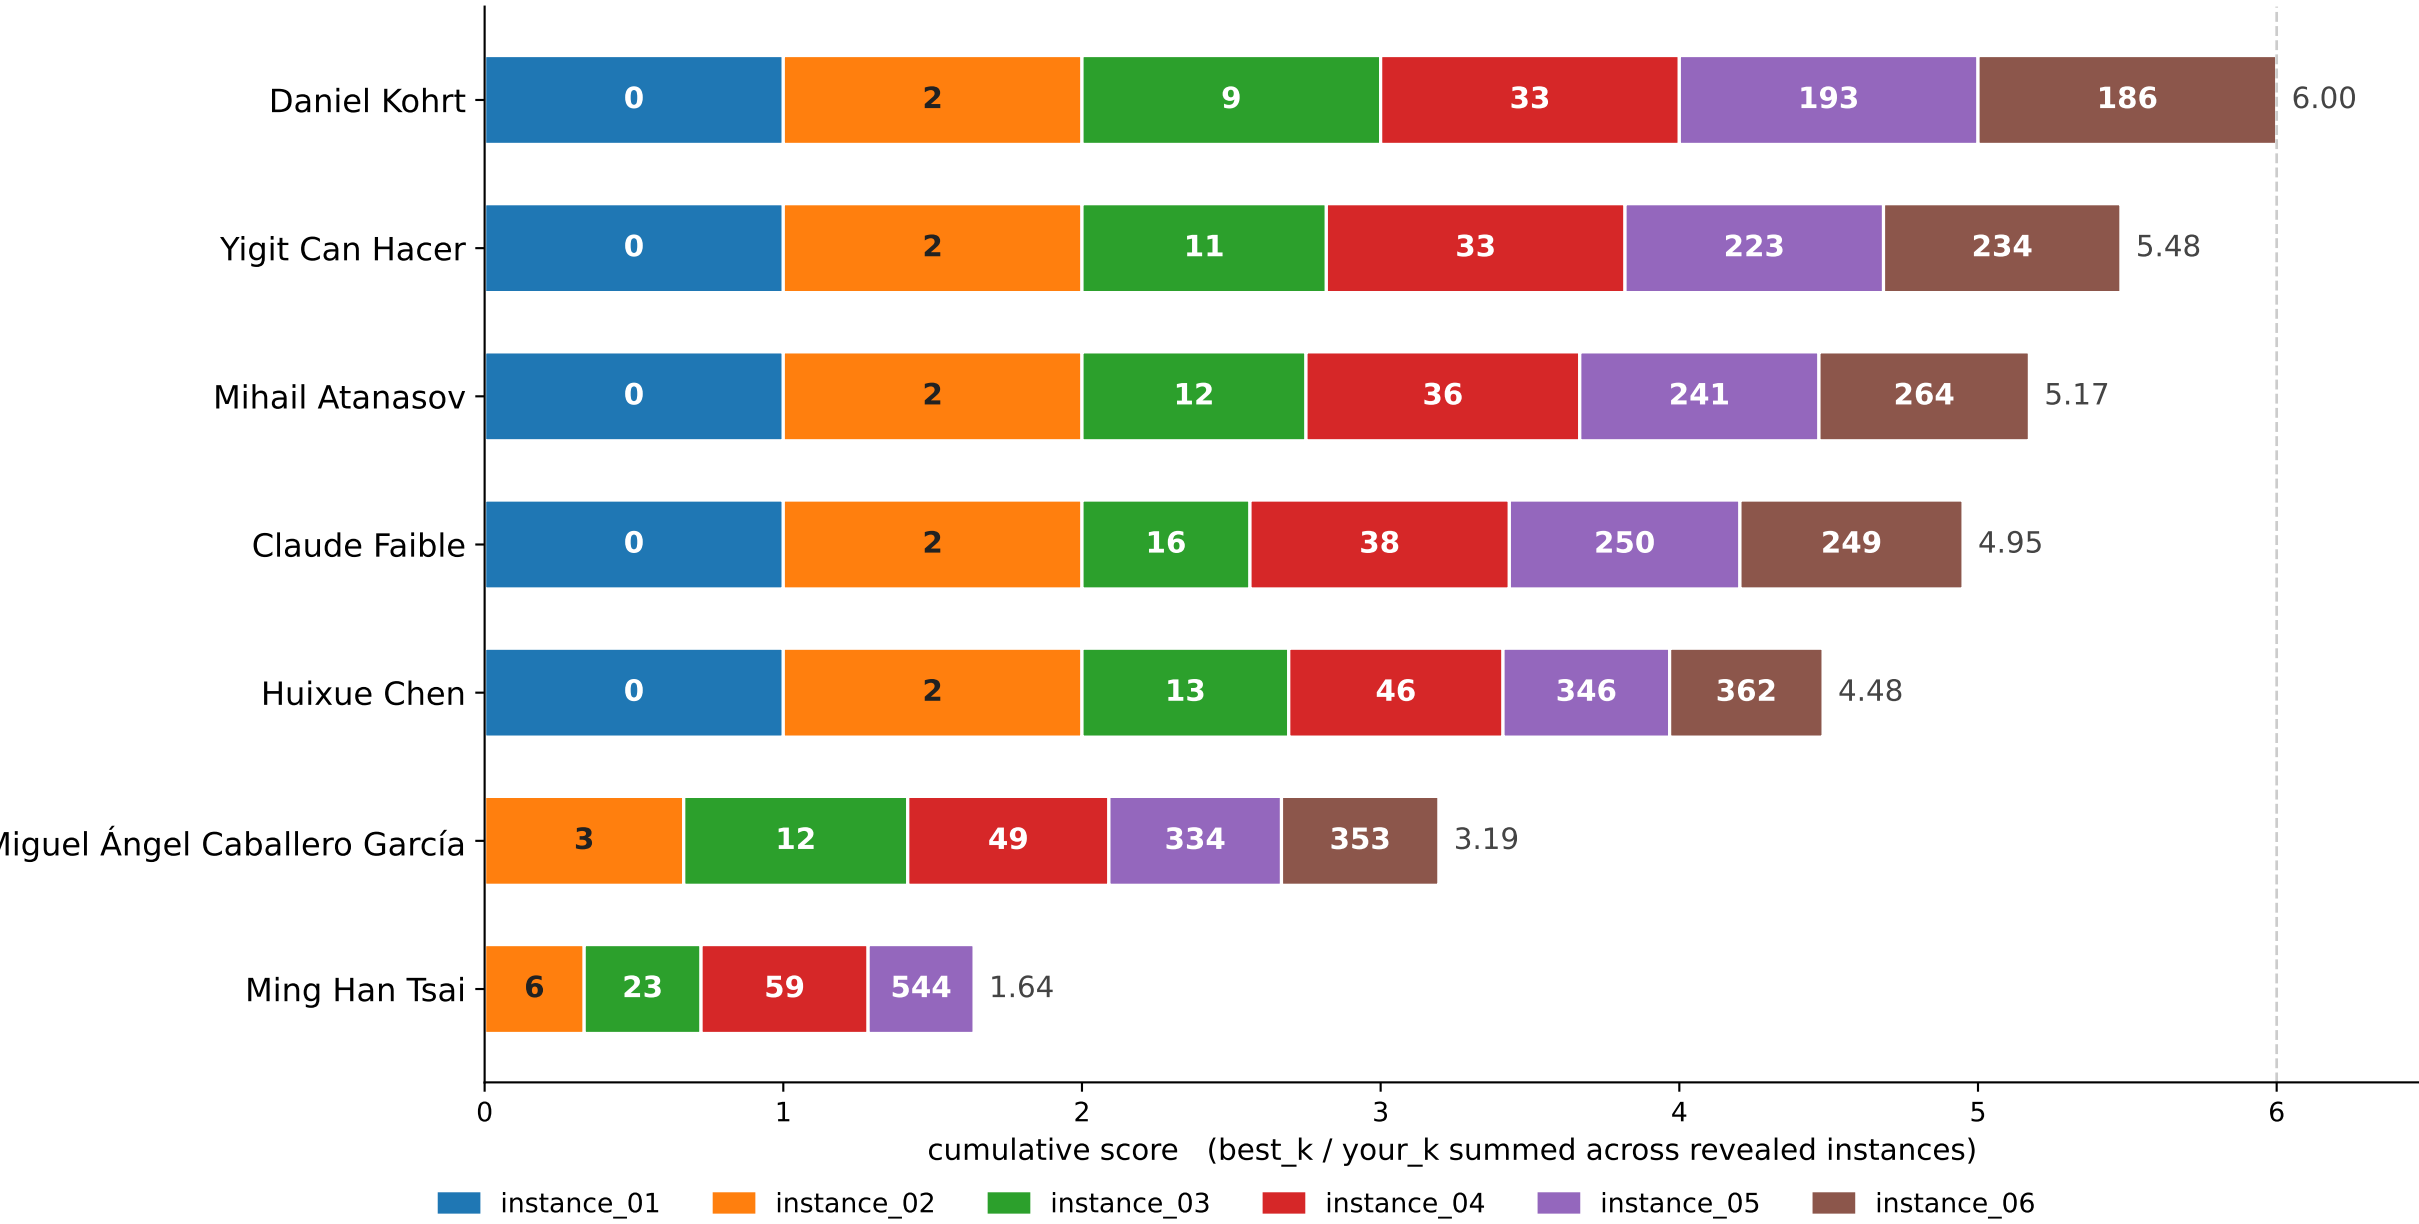

Ming Han Tsai
(no valid
submission)

Yigit Can Hacer · k=234

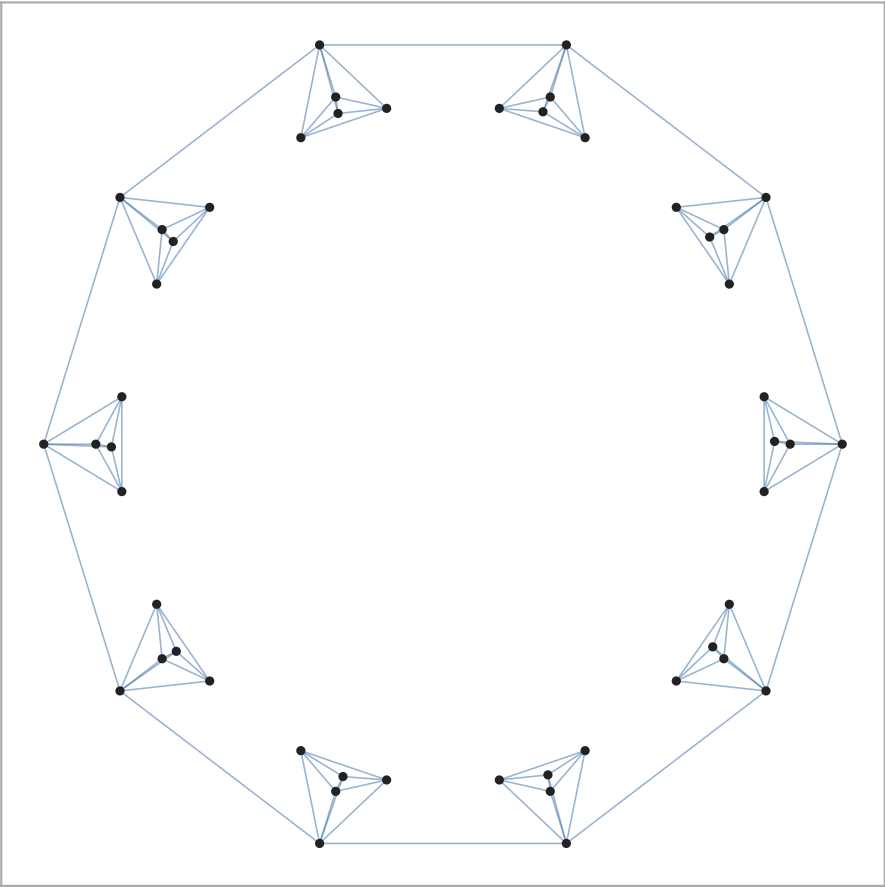

After Instance 6: instance_06

Cumulative score across instance_01 ... instance_06 · bar width = best_k / your_k · number inside = your k

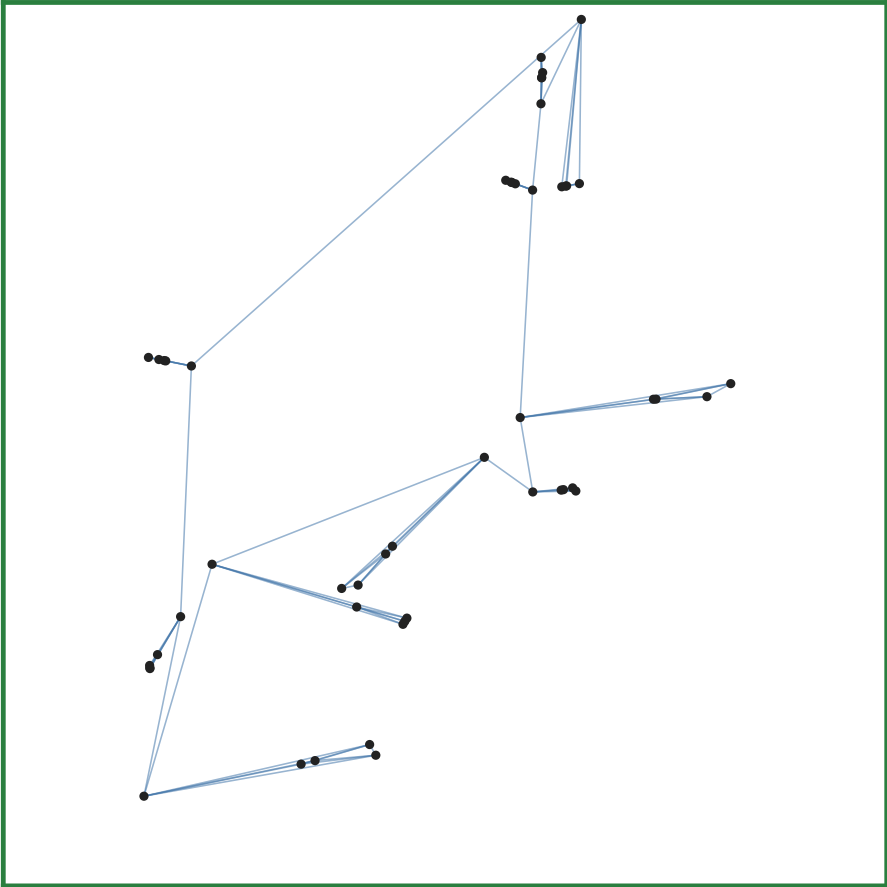

Instance 07 · 10 × K_5 ring

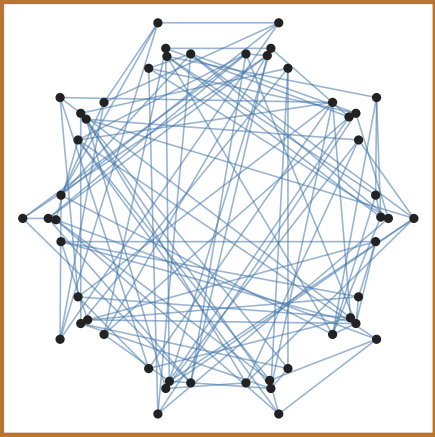

Top: ground truth (left) vs winning submission (right) · LB = 1
Ground truth · n=50, m=110, k=1

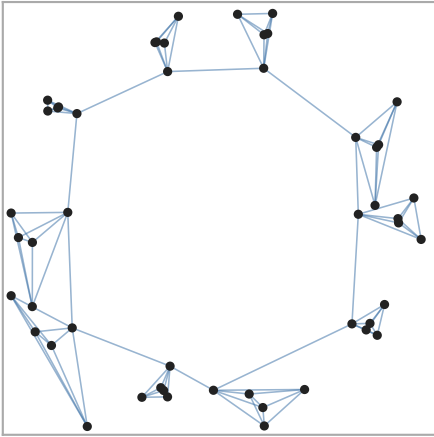

Miguel Ángel Caballero García (winner) · n=50, m=110, k=1

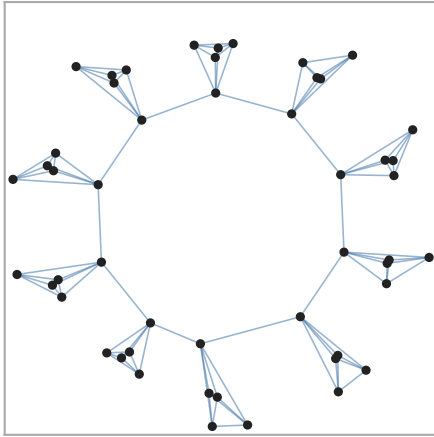

Input (shuffled) · k=52

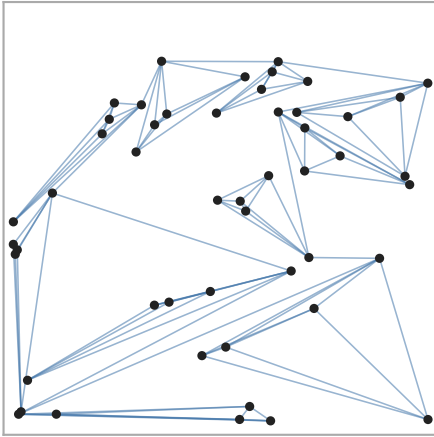

Daniel Kohrt · k=1

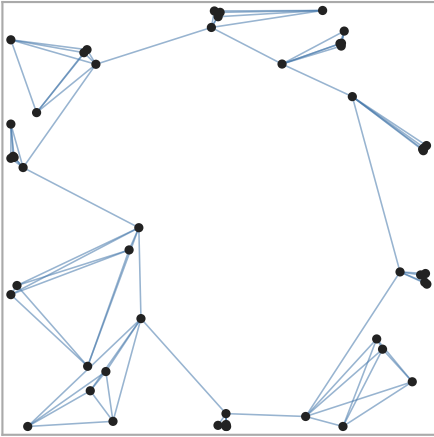

Huixue Chen · k=1

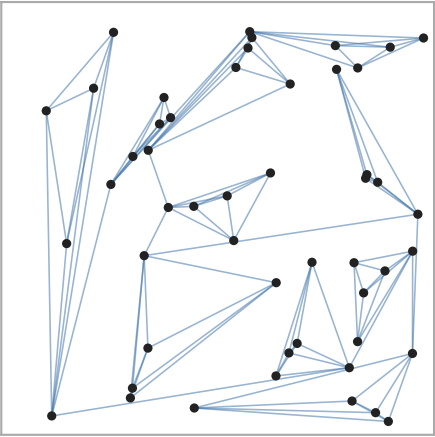

Mihail Atanasov · k=1

Ming Han Tsai · k=2

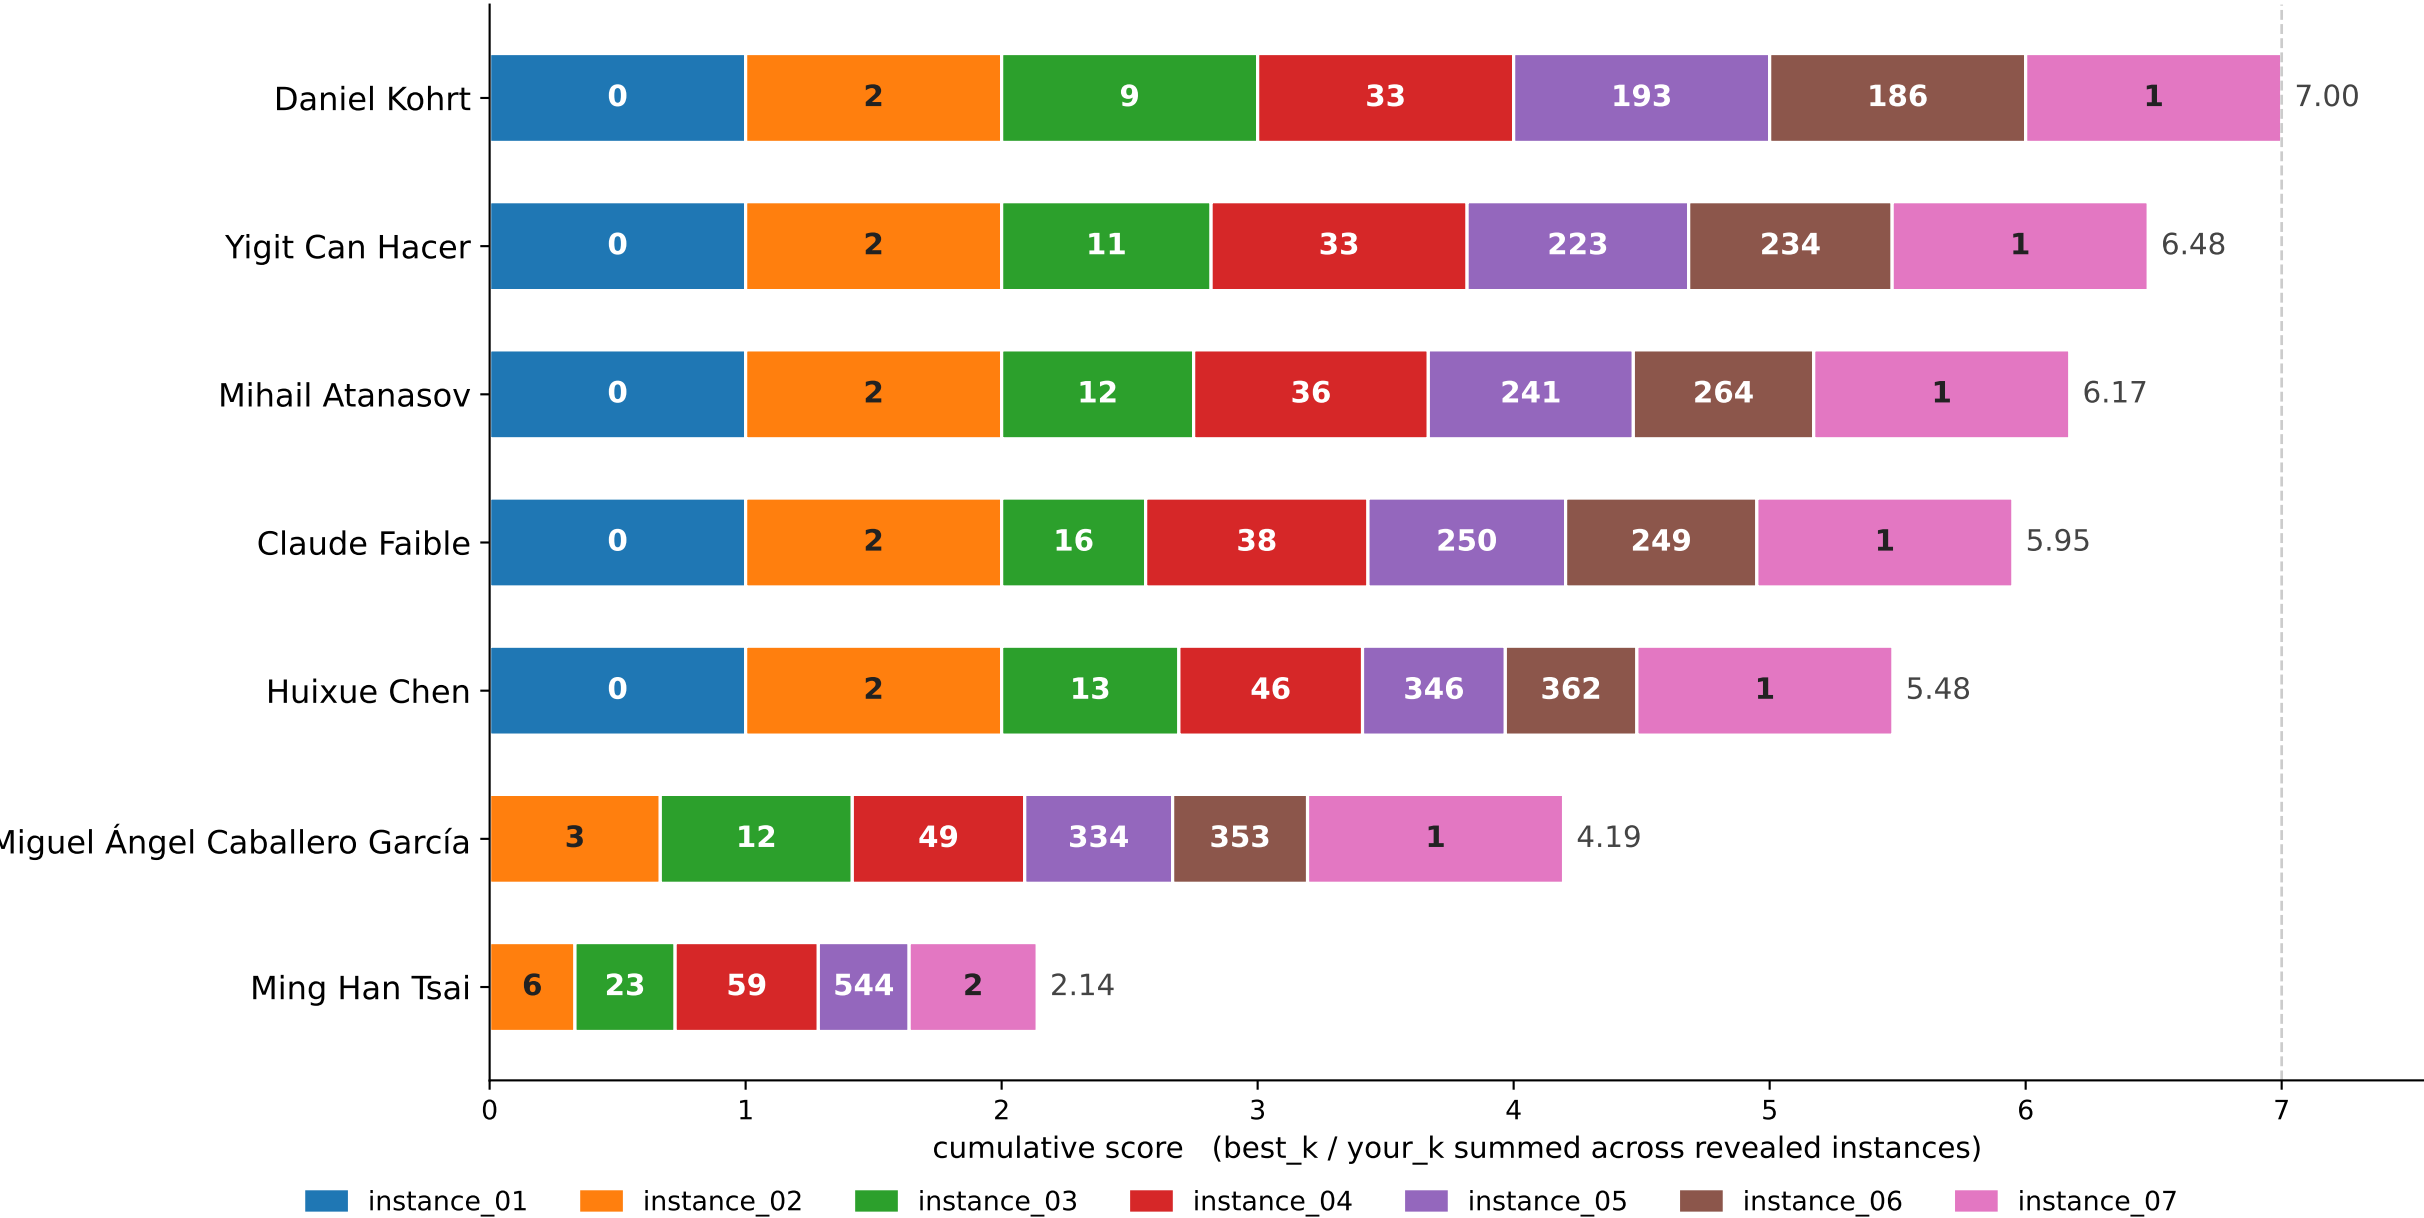

Yigit Can Hacer · k=1

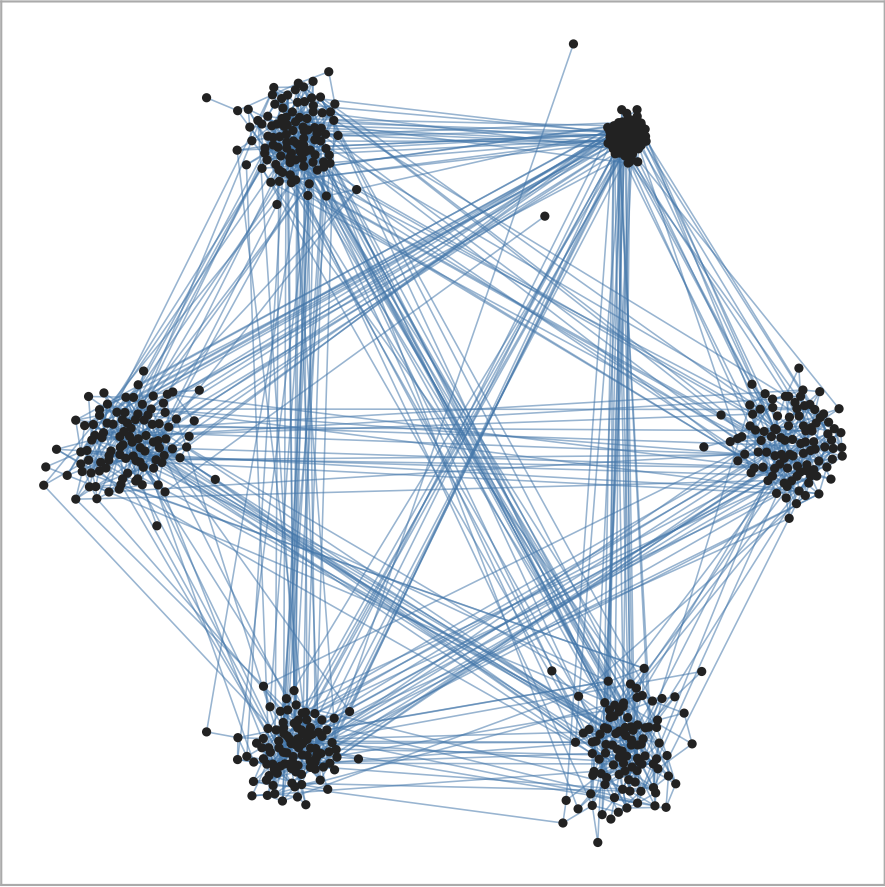

After Instance 7: instance_07

Cumulative score across instance_01 ... instance_07 · bar width = best_k / your_k · number inside = your k

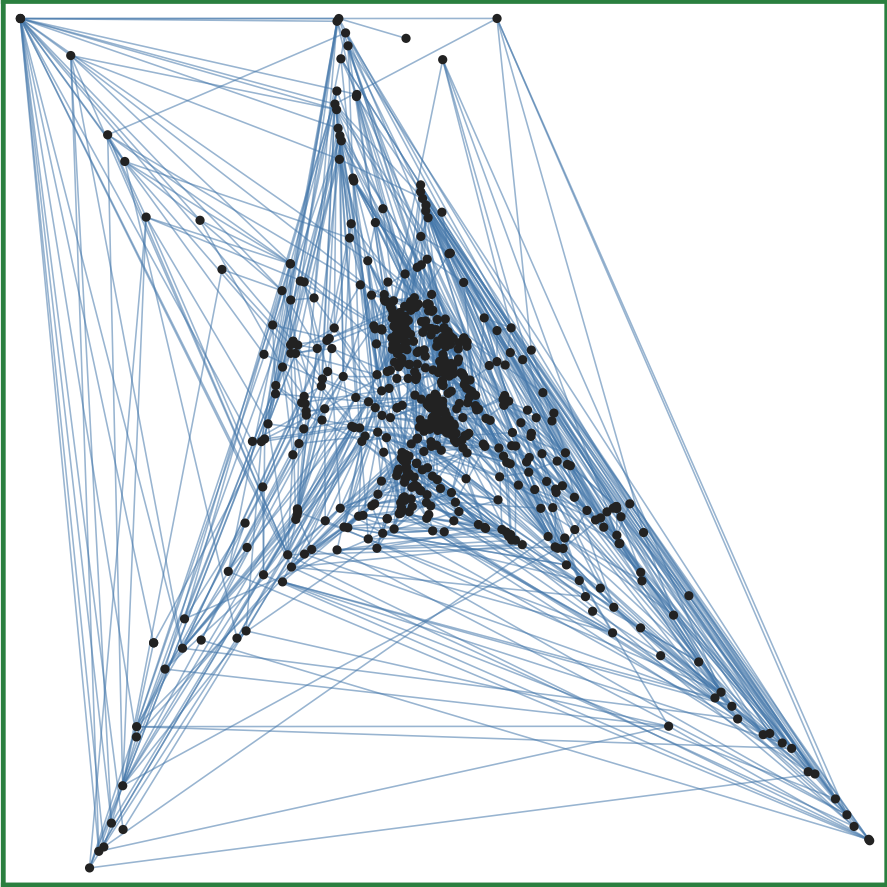

Instance 08 · Hierarchical (SBM, 6 blocks)

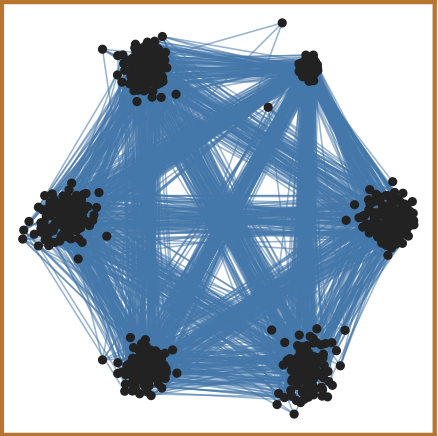

Top: ground truth (left) vs winning submission (right) · LB = unknown
Ground truth · n=600, m=1804, k=319

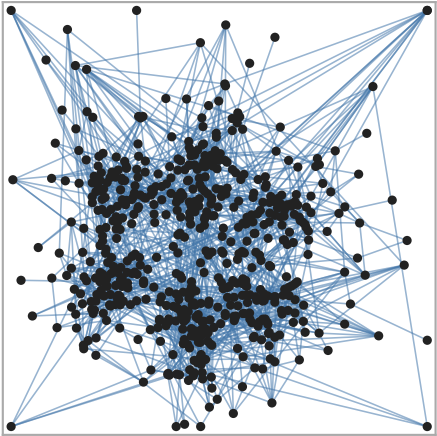

Daniel Kohrt (winner) · n=600, m=1804, k=53

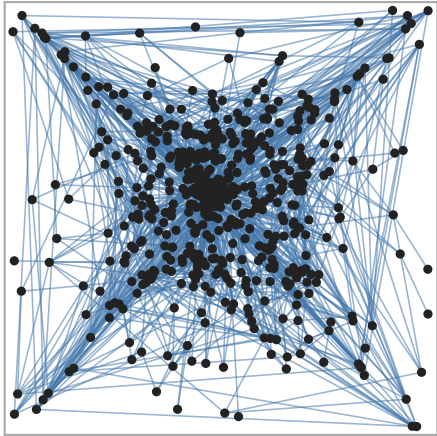

Input (shuffled) · k=912

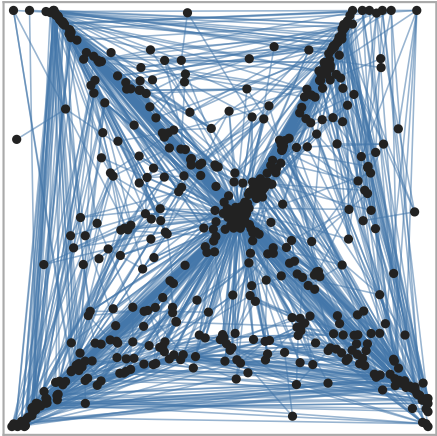

Huixue Chen · k=102

Miguel Ángel Caballero García · k=75

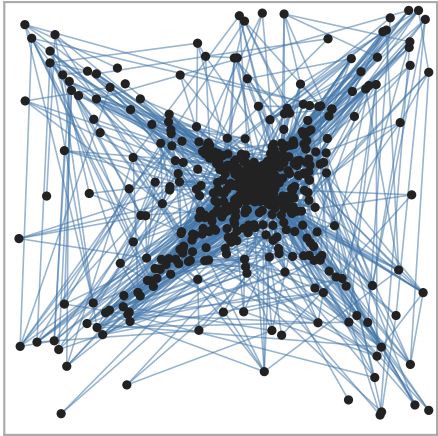

Mihail Atanasov · k=80

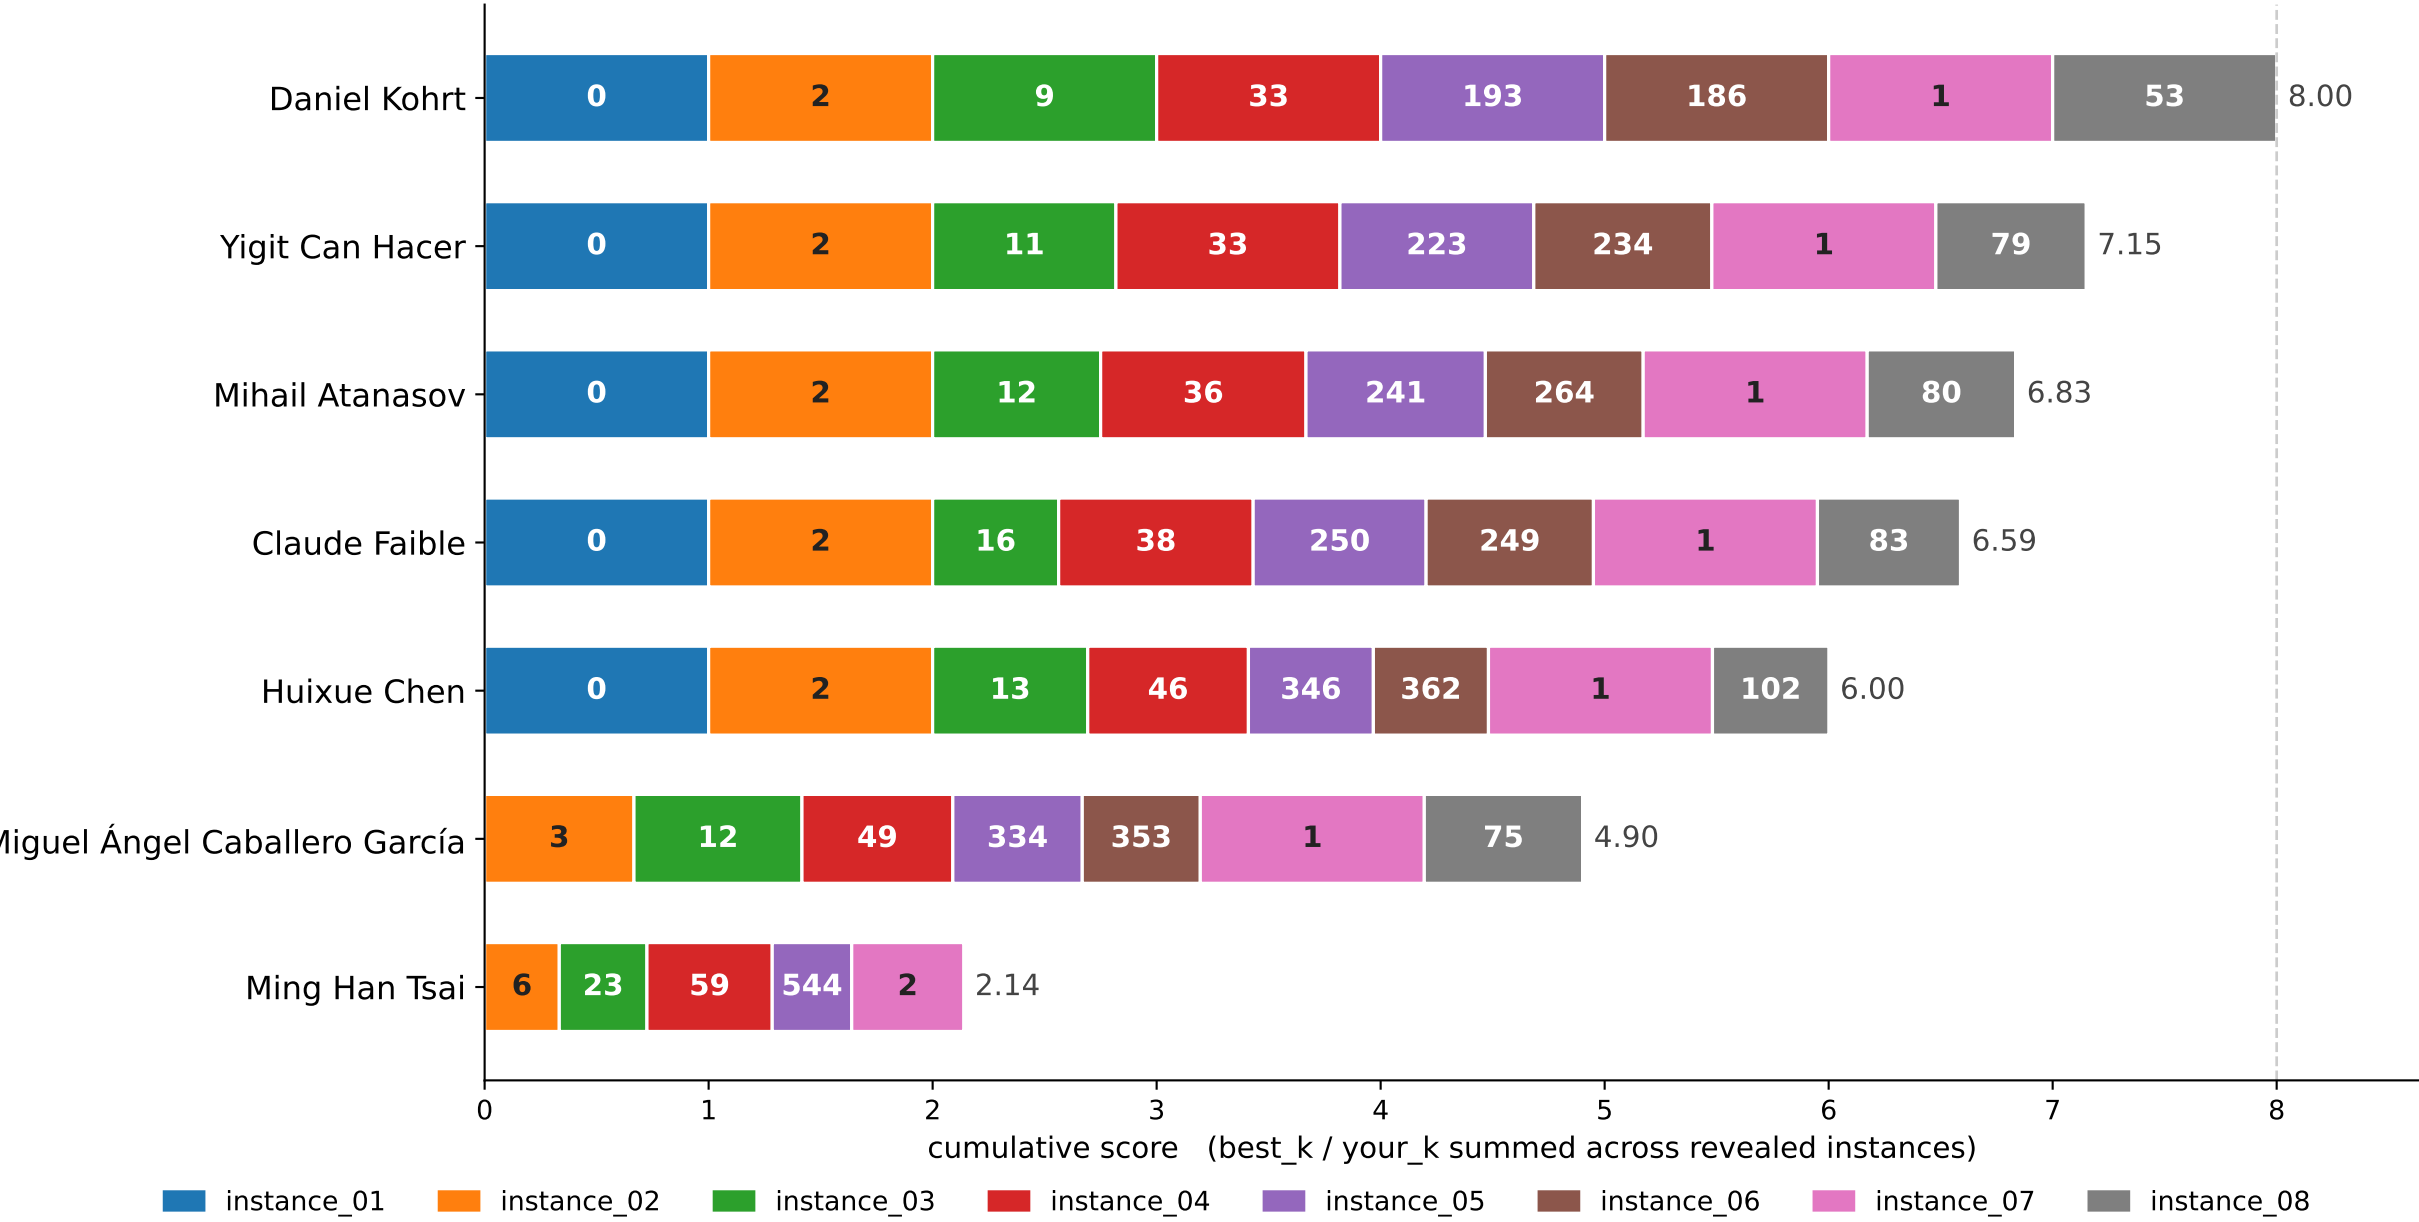

Ming Han Tsai
(no valid
submission)

Yigit Can Hacer · k=79

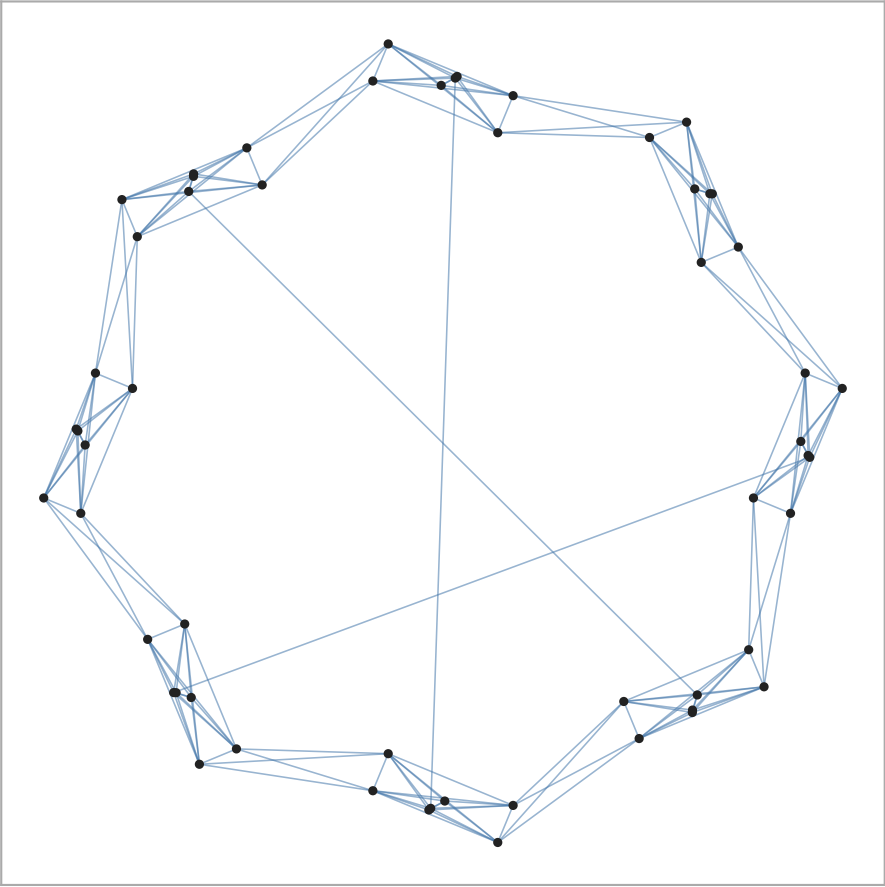

After Instance 8: instance_08

Cumulative score across instance_01 ... instance_08 · bar width = best_k / your_k · number inside = your k

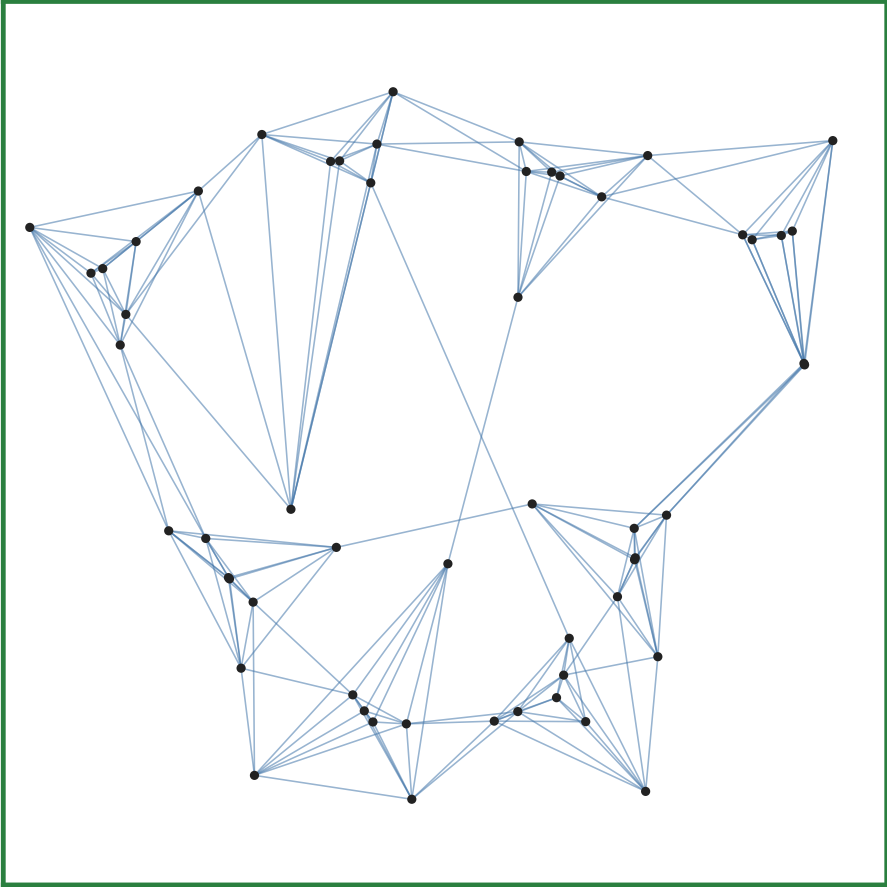

Instance 09 · 8 × K_7 cycle + K_{2,2} + 3 noise

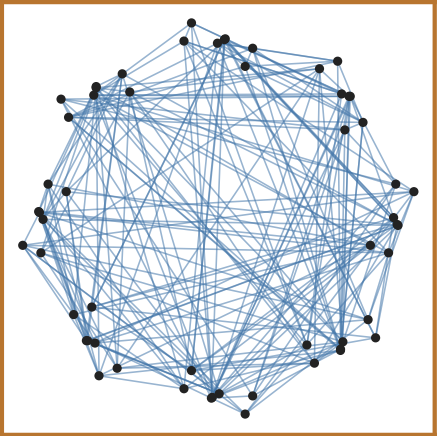

Top: ground truth (left) vs winning submission (right) · LB = 2
Ground truth · n=56, m=203, k=16

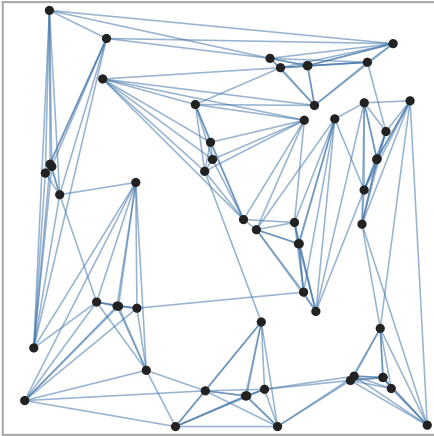

Huixue Chen (winner) · n=56, m=203, k=3

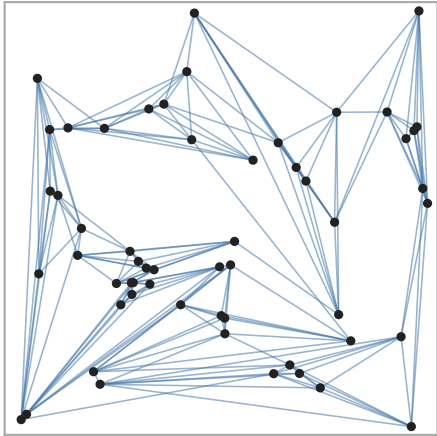

Input (shuffled) · k=92

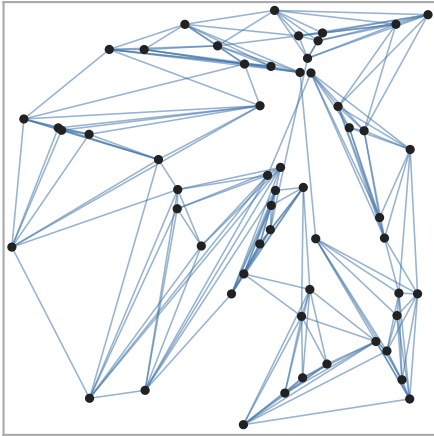

Daniel Kohrt · k=3

Miguel Ángel Caballero García · k=3

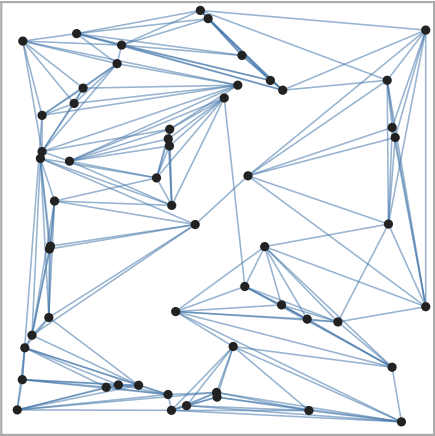

Mihail Atanasov · k=4

Ming Han Tsai
(no valid
submission)

Yigit Can Hacer · k=3

After Instance 9: instance_09

Cumulative score across instance_01 ... instance_09 · bar width = best_k / your_k · number inside = your k
